Cautionary Note Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Statements preceded by, followed by or that otherwise include the words "anticipates," "estimates," "expects," "foresees," "intends," "plans," "projects," and similar expressions or future or conditional verbs such as "could," "may," "might," "should," "will," and "would," or variations or negatives of such terms are generally forward-looking in nature and not historical facts, although not all forward-looking statements include the foregoing words. Forward-looking statements are not historical facts, and are based on current expectations, estimates and projections about our industry, management's beliefs and certain assumptions made by management, many of which, by their nature, are inherently uncertain and beyond our control. Accordingly, we caution you that any such forward-looking statements are not guarantees of future performance and are subject to risks, assumptions and uncertainties that are difficult to predict. Although we believe that the expectations reflected in our forward-looking statements are reasonable as of the date made, actual results may prove to be materially different from the results expressed or implied by the forward-looking statements.

There are or will be important factors that could cause our actual results to differ materially from those indicated in these forward-looking statements, including, but not limited to, the following:

- economic uncertainty or a deterioration in economic conditions or slowdowns in economic growth in the United States generally, and particularly in the market areas in which we operate and in which our loans are concentrated, including declines in home sale volumes and financial stress on borrowers (consumers and businesses) as a result of higher interest rates or an uncertain economic environment;
- recent adverse developments in the banking industry highlighted by high-profile bank failures and the potential impact of such developments on customer confidence, liquidity and regulatory responses to these developments (including increases in the cost of our deposit insurance assessments), our ability to effectively manage our liquidity risk and any growth plans and the availability of capital and funding;
- our ability to comply with applicable capital and liquidity requirements, including our ability to generate liquidity internally or raise capital on favorable terms, including continued access to the debt and equity capital markets;
- fluctuating and/or volatile interest rates, capital markets and the impact of inflation on our business and financial results, as well as the impact on our customers (including the velocity of loan repayment);
- changes in the interest rate environment may reduce interest margins;
- prepayment speeds, loan origination and sale volumes, charge-offs and loan loss provisions may vary substantially from period to period;
- global business and economic conditions and in the financial services industry, nationally and within our local market areas, including the
 impact of supply-chain disruptions and labor pressures;
- an increase in unemployment levels, slowdowns in economic growth and threats of recession;
- customer income, creditworthiness and confidence, spending and savings that may affect customer bankruptcies, defaults, charge-offs and deposit activity;
- the credit risk associated with the substantial amount of commercial real estate, construction and land development, and commercial loans in our loan portfolio;
- factors that can impact the performance of our loan portfolio, including real estate values and liquidity in our primary market areas, the
 financial health of our commercial borrowers and the success of construction projects that we finance, including any loans acquired in
 merger/acquisition transactions;

- natural disasters and adverse weather events (including hurricanes), acts of terrorism, an outbreak of hostilities, (including the impacts related
 to or resulting from Russia's military action in Ukraine, including the imposition of additional sanctions and export controls, as well as the
 broader impacts to financial markets and the global macroeconomic and geopolitical environments), regional or national protests and civil
 unrest (including any resulting branch closures or property damage), widespread illness or public health outbreaks or other international or
 domestic calamities, and other matters beyond our control;
- · system failures, cybersecurity threats and/or security breaches and the cost of defending against them;
- the discontinuation of LIBOR (and its replacement with alternatives) could result in financial, operational, legal, reputational or compliance risks to us;
- deterioration of our asset quality;
- risks associated with widespread inflation or deflation;
- the risks of mergers, acquisitions and divestitures, including our ability to continue to identify acquisition or merger targets and successfully acquire and integrate desirable financial institutions;
- changes in the value of collateral securing our loans;
- our ability to anticipate interest rate changes and manage interest rate risk;
- the effectiveness of our risk management framework and quantitative models;
- our inability to receive dividends from our bank subsidiary and to service debt, pay dividends to our common stockholders, repurchase our shares of common stock and satisfy obligations as they become due;
- changes in our operation or expansion strategy or our ability to prudently manage our growth and execute our strategy;
- changes in management personnel;
- our ability to maintain important deposit customer relationships, our reputation or otherwise avoid liquidity risks;
- increasing costs as we grow and compete for deposits;
- operational risks associated with our business;
- increased competition in the financial services industry, particularly from regional and national institutions, as well as fintech companies, may
 accelerate due to the current economic environment;
- our level of nonperforming assets and the costs associated with resolving any problem loans, including litigation and other costs;
- potential claims, damages, penalties, fines and reputational damage resulting from pending or future litigation, regulatory proceedings or enforcement actions;
- risks related to environmental, social and governance ("ESG") strategies and initiatives, the scope and pace of which could alter our reputation and shareholder, associate, customer and third-party affiliations;
- changes in the utility of our non-GAAP measurements and their underlying assumptions or estimates;
- changes in the laws, rules, regulations, interpretations or policies relating to financial institutions, as well as tax, trade, monetary and fiscal matters, and the possibility that the U.S. could default on its debt obligations;
- periodic changes to the extensive body of accounting rules and best practices, may change the treatment and recognition of critical financial line items and affect our profitability;
- further government intervention in the U.S. financial system;

Table of Contents

- compliance with governmental and regulatory requirements, including the Dodd-Frank Wall Street Reform and Consumer Protection Act and others relating to banking, consumer protection, securities and tax matters; and
- our ability to manage the risks involved in the foregoing.

The foregoing factors should not be construed as exhaustive and should be read together with the other cautionary statements included in this report. If one or more events related to these or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may differ materially from what we anticipate. In addition, as a result of these and other factors, our past financial performance should not be relied upon as an indication of future performance. Accordingly, you should not place undue reliance on any forward-looking statements. Any forward-looking statement speaks only as of the date on which it is made, and we do not undertake any obligation to publicly update or review any forward-looking statement, whether as a result of new information, future developments or otherwise. New risks and uncertainties emerge from time to time, and it is not possible for us to predict those events or how they may affect us. In addition, we cannot assess the impact of each factor on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.

Note 1 — Significant Accounting Policies

Nature of Operations. Origin Bancorp, Inc. ("Company") is a financial holding company headquartered in Ruston, Louisiana. The Company's wholly-owned bank subsidiary, Origin Bank ("Bank"), was founded in 1912 in Choudrant, Louisiana. Deeply rooted in Origin's history is a culture committed to providing personalized, relationship banking to businesses, municipalities, and personal clients to enrich the lives of the people in the communities it serves. Origin provides a broad range of financial services and currently operates 60 banking centers located in Dallas/Fort Worth, East Texas, Houston, North Louisiana and Mississippi. The Company principally operates in one business segment, community banking.

Basis of Presentation. The consolidated financial statements in this quarterly report on Form 10-Q include the accounts of the Company and all other entities in which Origin Bancorp, Inc. has a controlling financial interest, including the Bank and Davison Insurance Agency, LLC, doing business as Lincoln Agency, LLC (the "Lincoln Agency"), Lincoln Agency Transportation Insurance, Pulley-White Insurance Agency ("Pulley-White"), Reeves, Coon and Funderburg, Simoneaux & Wallace Agency and Thomas & Farr Agency. All significant intercompany balances and transactions have been eliminated in consolidation. The Company's accounting and financial reporting policies conform, in all material respects, to generally accepted accounting principles in the United States ("U.S. GAAP") and to general practices within the financial services industry. The Company has evaluated subsequent events for potential recognition and/or disclosure through the date these consolidated financial statements were issued.

The consolidated financial statements in this quarterly report on Form 10-Q have not been audited by an independent registered public accounting firm, excluding the figures as of December 31, 2022, but in the opinion of management, reflect all adjustments (which are of a normal recurring nature) necessary for a fair presentation of the Company's financial position and results of operations for the periods presented. These consolidated financial statements of the Company have been prepared in accordance with U.S. GAAP and with the rules and regulations of the Securities and Exchange Commission (the "SEC") for interim financial reporting. Accordingly, they do not include all of the information and notes required by U.S. GAAP for complete financial statements.

These consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto for the year ended December 31, 2022, included in the Company's annual report on Form 10-K ("2022 Form 10-K") filed with the SEC. Operating results for the interim periods disclosed herein are not necessarily indicative of results that may be expected for a full year. Certain prior period amounts have been reclassified to conform to the current year financial statement presentations. These reclassifications did not impact previously reported net income or comprehensive income (loss).

Use of Estimates. The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions based on available information that affect the amounts reported in the financial statements and disclosures provided, including the accompanying notes, and actual results could differ. Material estimates, that are particularly susceptible to change, include the allowance for credit losses for loans, off-balance sheet commitments and available for sale securities; fair value measurements of assets and liabilities; and income taxes. Estimates and assumptions are reviewed periodically, and the effects of revisions are reflected in the Company's consolidated financial statements in the period they are deemed necessary. While management uses its best judgment, actual results could differ from those estimates.

Allowance for Credit Losses. Accounting Standards Update ("ASU") No. 2022-02 eliminated the accounting guidance for troubled debt restructurings ("TDRs") and enhanced disclosure requirements for certain loan modifications. The Company may provide modifications to borrowers experiencing financial difficulty in the form of principal forgiveness, interest rate reductions, other-than-insignificant payment delays, or term extensions. When principal forgiveness is provided, the amount of forgiveness is charged-off against the allowance for credit losses. In some cases, the Company may provide multiple types of concessions on one loan. The Company will evaluate whether the modification represents a new loan or a continuation of an existing loan. The Company assesses all loan modifications to determine whether they were made to borrowers experiencing financial difficulty.

Reclassifications. Certain amounts previously reported have been reclassified to conform to the current presentation. Such reclassifications had no effect on prior year net income or stockholders' equity.

Effect of Recently Adopted Accounting Standards

ASU No. 2021-06, Presentation of Financial Statements (Topic 205), Financial Services —Depository and Lending (Topic 942), and Financial Services —Investment Companies (Topic 946) —Amendments to SEC Paragraphs Pursuant to SEC Final Rule Releases No. 33-10786, Amendments to Financial Disclosures about Acquired and Disposed Businesses, and No. 33-10835, Update of Statistical Disclosures for Bank and Savings and Loan Registrants amends the Accounting Standards Codification ("ASC") in order to codify to the new SEC releases 33-10786 and 33-10835 (the "Releases"). The Releases clearly define whether an acquired or disposed business subsidiary is significant; update, expand and eliminate certain disclosures; eliminate overlap with certain SEC and U.S. GAAP rules; and add a new subpart of Regulation S-K. The ASU is effective upon issuance; however, the SEC release on which the ASU is based is effective for registrants with the first fiscal year ending after December 15, 2021, while Guide 3 were rescinded effective January 1, 2023. Implementation of this ASU did not materially impact the Company's financial statement disclosures.

ASU No. 2021-08, Business Combinations (Topic 805) — Accounting for Contract Assets and Contract Liabilities from Contracts with Customers. The amendments in this Update affect accounting for acquired revenue contracts with customers in a business combination by addressing diversity in practice and inconsistency related to recognition of an acquired contract liability and payment terms and their effect on subsequent revenue recognized by the acquirer. The ASU is effective for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years. Implementation of this ASU did not materially impact the Company's financial statements or disclosures.

ASU No. 2022-01, Derivatives and Hedging (Topic 815) — Fair Value Hedging - Portfolio Layer Method. The amendments in this Update clarify the accounting for and promote consistency in the reporting of hedge basis adjustments applicable to both a single hedged layer and multiple hedged layers. Additionally, this Update allows entities to elect to apply the portfolio layer method of hedge accounting in accordance with Topic 815. The ASU is effective for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years. Implementation of this ASU did not materially impact the Company's financial statements or disclosures.

ASU No. 2022-02, Financial Instruments - Credit Losses (Topic 326) — Troubled Debt Restructurings and Vintage Disclosures. The amendments in this Update eliminate the accounting guidance for TDRs by creditors in Subtopic 310-40, Receivables—Troubled Debt Restructurings by Creditors, while enhancing disclosure requirements for certain loan refinancings and restructurings by creditors when a borrower is experiencing financial difficulty. Specifically, rather than applying the recognition and measurement guidance for TDRs, an entity must apply the loan refinancing and restructuring guidance in paragraphs 310-20-35-9 through 35-11 to determine whether a modification results in a new loan or a continuation of an existing loan. For public business entities, the amendments in this Update require that an entity disclose current-period gross write-offs by year of origination for financing receivables and net investments in leases within the scope of Subtopic 326-20, Financial Instruments—Credit Losses—Measured at Amortized Cost. The ASU is effective for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years. Implementation of this ASU did not materially impact the Company's financial statements or disclosures.

ASU No. 2022-06, Reference Rate Reform (Topic 848) - Deferral of the Sunset Date of Topic 848 — The amendments in this Update provide temporary relief during the transition period in complying with Update No. 2020-04, Reference Rate Reform (Topic 848) - Facilitation of the Effects of Reference Rate Reform on Financial Reporting, which provides optional guidance to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform on financial reporting. The Board included a sunset provision within Topic 848 based on expectations of when the London Interbank Offered Rate (LIBOR) would cease being published. At the time that Update 2020-04 was issued, the UK Financial Conduct Authority (FCA) had established its intent that it would no longer be necessary to persuade, or compel, banks to submit to LIBOR after December 31, 2021. As a result, the sunset provision was set for December 31, 2022 - 12 months after the expected cessation date of all currencies and tenors of LIBOR. In March 2021, the FCA announced that the intended cessation date of the overnight 1-, 3-, 6-, and 12-month tenors of USD LIBOR would be June 30, 2023, which is beyond the current sunset date of Topic 848.

Because the current relief in Topic 848 may not cover a period of time during which a significant number of modifications may take place, the amendments in this Update defer the sunset date of Topic 848 from December 31, 2022, to December 31, 2024, after which entities will no longer be permitted to apply the relief in Topic 848. The ASU is effective immediately. Implementation of this ASU did not materially impact the Company's financial statements or disclosures.

Note 2 — Earnings Per Share

Basic and diluted earnings per common share are calculated using the treasury method. Under the treasury method, basic earnings per share is calculated as net income divided by the weighted average number of common shares outstanding during the period. Diluted earnings per share includes the dilutive effect of additional potential common shares issuable under the Company's stock and incentive compensation plans. Information regarding the Company's basic and diluted earnings per common share is presented in the following table:

(Dollars in thousands, except per share amounts)	Three Months Ended March 31,				
Numerator:	 2023		2022		
Net income	\$ 24,302	\$	20,683		
Denominator:					
Weighted average common shares outstanding	30,742,902		23,700,550		
Dilutive effect of stock-based awards	139,254		70,241		
Weighted average diluted common shares outstanding	 30,882,156		23,770,791		
Basic earnings per common share	\$ 0.79	\$	0.87		
Diluted earnings per common share	0.79		0.87		

Note 3 — Securities

The following table is a summary of the amortized cost and estimated fair value, including the allowance for credit losses and gross unrealized gains and losses, of available for sale, held to maturity and securities carried at fair value through income for the dates indicated:

(Dollars in thousands) March 31, 2023	 Amortized Cost	Gross Unrealized Gains		Gross Unrealized Losses			Fair Value		Allowance for Credit Losses		et Carrying Amount
Available for sale:

Held to maturity:						·						
State and municipal securities	\$	6,518	\$	(482)	\$		\$		\$	6,518	\$	(482)

At March 31, 2023, the Company had 682 individual securities that were in an unrealized loss position. Management evaluates available for sale debt securities in unrealized loss positions to determine whether the impairment is due to credit-related factors or noncredit-related factors. Consideration is given to (1) the extent to which the fair value is less than the cost, (2) the financial condition and near-term prospects of the issuer, and (3) the intent and ability of the Company to retain its investment in the security for a period of time sufficient to allow for any anticipated recovery in fair value.

Management does not have the intent to sell any of the securities in an unrealized loss position and believes that it is more likely than not that the Company will not have to sell any such securities before a recovery of cost. The fair value is expected to recover as the securities approach their maturity date or repricing date or if market yields for such investments decline. Accordingly, at March 31, 2023, management believes that the unrealized losses detailed in the previous table are due to noncredit-related factors, including changes in interest rates and other market conditions.

The following table presents the activity in the allowance for credit losses for held-to-maturity debt securities.

(Dollars in thousands)	Munic	ipal Securities
Allowance for credit losses:		2023
Balance at January 1, 2023	\$	899
Credit loss expense		82
Balance at March 31, 2023	\$	981
Balance at January 1, 2022	\$	167
Credit loss expense		185
Balance at March 31, 2022	\$	352

Accrued interest of \$7.5 million and \$6.8 million was not included in the calculation of the allowance or the amortized cost basis of the debt securities at March 31, 2023 or 2022, respectively. There were no past due held-to-maturity securities or held-to-maturity securities in nonaccrual status at March 31, 2023, or December 31, 2022.

Proceeds from sales and calls, and related gross gains and losses of securities available for sale, are shown below.

		Three Months I	Ended March 3	31,
(Dollars in thousands)	·	2023	20	022
Proceeds from sales/calls	\$	39,195	\$	2,662
Gross realized gains		596		
Gross realized losses		(452)		_

The following table presents the amortized cost and fair value of securities available for sale and held to maturity at March 31, 2023, grouped by contractual maturity. Mortgage-backed securities, collateralized mortgage obligations and asset-backed securities, which do not have contractual payments due at a single maturity date, are shown separately. Actual maturities for mortgage-backed securities, collateralized mortgage obligations and asset-backed securities will differ from contractual maturities as a result of prepayments made on the underlying loans.

(Dollars in thousands)		Held to	Matu	rity	Available for Sale

Owner occupied commercial real estate	\$	855,887	\$	843,006
Non-owner occupied commercial real estate		1,529,513		1,461,672
Total commercial real estate		2,385,400		2,304,678
Construction/land/land development		948,626		945,625
Residential real estate		1,588,491		1,477,538
Total real estate		4,922,517		4,727,841
Commercial and industrial		2,091,093		2,051,161
Mortgage warehouse lines of credit		337,529		284,867
Consumer		24,684		26,153
Total LHFI ⁽¹⁾		7,375,823		7,090,022
Less: Allowance for loan credit losses		92,008		87,161
LHFI, net	\$	7,283,815	\$	7,002,861

⁽¹⁾ Includes unamortized purchase accounting adjustment and net deferred loan fees of \$12.4 million and \$14.2 million at March 31, 2023, and December 31, 2022, respectively. As of March 31, 2023, and December 31, 2022, the remaining purchase accounting net loan discount was \$629,000 and \$2.2 million, respectively.

Credit quality indicators. As part of the Company's commitment to managing the credit quality of its loan portfolio, management annually and periodically updates and evaluates certain credit quality indicators, which include but are not limited to (i) weighted-average risk rating of the loan portfolio, (ii) net charge-offs, (iii) level of non-performing loans, (iv) level of classified loans (defined as substandard, doubtful and loss), and (v) the general economic conditions in the cities and states in which the Company operates. The Company maintains an internal risk rating system where ratings are assigned to individual loans based on assessed risk. Loan risk ratings are the primary indicator of credit quality for the loan portfolio and are continually evaluated to ensure they are appropriate based on currently available information.

The following is a summary description of the Company's internal risk ratings:

• Pass (1-6) Loans within this risk rating are further categorized as follows:

Minimal risk (1) Well-collateralized by cash equivalent instruments held by the Banks.

Borrowers with excellent asset quality and liquidity. Borrowers' capitalization and liquidity exceed industry Moderate risk (2)

norms. Borrowers in this category have significant levels of liquid assets and have a low level of leverage.

Borrowers with strong financial strength and excellent liquidity that consistently demonstrate strong operating performance. Borrowers in this category generally have a sizable net worth that can be converted into liquid Better than average risk (3)

assets within 12 months.

Average risk (4) Borrowers with sound credit quality and financial performance, including liquidity. Borrowers are supported

by sufficient cash flow coverage generated through operations across the full business cycle.

Marginally acceptable risk (5) Loans generally meet minimum requirements for an acceptable loan in accordance with lending policy, but

possess one or more attributes that cause the overall risk profile to be higher than the majority of newly

Watch (6) A passing loan with one or more factors that identify a potential weakness in the overall ability of the

borrower to repay the loan. These weaknesses are generally mitigated by other factors that reduce the risk of

delinquency or loss.

• Special Mention (7) This grade is intended to be temporary and includes borrowers whose credit quality has deteriorated and is at

risk of further decline.

· Substandard (8) This grade includes "Substandard" loans under regulatory guidelines. Substandard loans exhibit a well-

defined weakness that jeopardizes debt repayment in accordance with contractual agreements, even though the loan may be performing. These obligations are characterized by the distinct possibility that a loss may be incurred if these weaknesses are not corrected and repayment may be dependent upon collateral liquidation or

secondary source of repayment.

This grade includes "Doubtful" loans under regulatory guidelines. Such loans are placed on nonaccrual status • Doubtful (9) and repayment may be dependent upon collateral with no readily determinable valuation or valuations that are

highly subjective in nature. Repayment for these loans is considered improbable based on currently existing

facts and circumstances.

This grade includes "Loss" loans under regulatory guidelines. Loss loans are charged-off or written down • Loss (0)

when repayment is not expected.

In connection with the review of the loan portfolio, the Company considers risk elements attributable to particular loan types or categories in assessing the quality of individual loans. The list of loans to be reviewed for possible individual evaluation consists of nonaccrual commercial loans over \$100,000 with direct exposure, unsecured loans over 90 days past due, commercial loans classified substandard or worse over \$100,000 with direct exposure, modified loans to borrowers experiencing financial difficulty, consumer loans greater than \$100,000 with a FICO score under 625, loans greater than \$100,000 in which the borrower has filed bankruptcy, and all loans 180 days or more past due. Loans under \$50,000 will be evaluated collectively in designated pools unless a loss exposure has been identified. Some additional risk elements considered by loan type include:

- for commercial real estate loans, the debt service coverage ratio, operating results of the owner in the case of owner-occupied properties, the loan to value ratio, the age and condition of the collateral and the volatility of income, property value and future operating results typical of properties of that type;
- for construction, land and land development loans, the perceived feasibility of the project, including the ability to sell developed lots or improvements constructed for resale or the ability to lease property constructed for lease, the quality and nature of contracts for presale or prelease, if any, experience and ability of the developer and loan to value ratio;
- for residential mortgage loans, the borrower's ability to repay the loan, including a consideration of the debt to income ratio and employment and income stability, the loan-to-value ratio, and the age, condition and marketability of the collateral; and

• for commercial and industrial loans, the debt service coverage ratio (income from the business in excess of operating expenses compared to loan repayment requirements), the operating results of the commercial, industrial or professional enterprise, the borrower's business, professional and financial ability and expertise, the specific risks and volatility of income and operating results typical for businesses in that category and the value, nature and marketability of collateral.

Purchased loans that have experienced more than insignificant credit deterioration since origination are PCD loans. An allowance for credit losses is determined using the same methodology as other individually evaluated loans. As a result of the merger with BTH, the Company held approximately \$44.6 million and \$48.1 million of unpaid principal balance PCD loans at March 31, 2023, and December 31, 2022, respectively.

Please see *Note 1 — Significant Accounting Policies* included in the 2022 Form 10-K, filed with the SEC for a description of our accounting policies related to purchased financial assets with credit deterioration.

The following table reflects recorded investments in loans by credit quality indicator and origination year at March 31, 2023, excluding loans held for sale and loans accounted for at fair value. Loans acquired are shown in the table by origination year, not merger date. The Company had an immaterial amount of revolving loans converted to term loans at March 31, 2023.

The following tables detail activity in the allowance for loan credit losses by portfolio segment. Accrued interest of \$28.5 million and \$15.5 million was not included in the book value for the purposes of calculating the allowance at March 31, 2023 and 2022, respectively. Allocation of a portion of the allowance to one category of loans does not preclude its availability to absorb losses in other categories.

Three Months Ended March 31, 2023

Net Charge-offs to Loan Average Balance (annualize	ed)	0.04 %	, 0	— %		0.03 %		0.43 %		— %		0.25 %	0.14 %

⁽¹⁾ The \$327,000 provision for credit losses net benefit on the consolidated statement of income includes a \$659,000 provision for loan losses net benefit, a \$147,000 provision for off-balance sheet commitments and a \$185,000 provision for held to maturity securities credit losses for the three months ended March 31, 2022.

The increase in provision expense during the three months ended March 31, 2023, compared to the three months ended March 31, 2022, is primarily due to loan growth during the intervening period. The allowance for loan credit losses increased \$29.8 million compared to March 31, 2022, primarily due to a \$25.2 million allowance for BTH loans at March 31, 2023.

Including the impact of the BTH-acquired loans, the Company's credit quality profile in relation to the allowance for loan credit losses drove an increase of \$30.0 million in the collectively evaluated portion of the reserve at March 31, 2023, when compared to March 31, 2022, of which \$23.4 million was related to qualitative factor changes across the Company's risk pools.

The following table presents the amortized cost basis of collateral dependent loans, which are individually evaluated to determine expected credit losses, and the related Allowance for Loan Credit Losses ("ALCL") allocated to these loans.

Collateral-dependent loans consist primarily of residential real estate, commercial real estate and commercial and industrial loans. These loans are individually evaluated when foreclosure is probable or when the repayment of the loan is expected to be provided substantially through the operation or sale of the underlying collateral. In the case of commercial and industrial loans secured by equipment, the fair value of the collateral is estimated by third-party valuation experts. Loan balances are charged down to the underlying collateral value when they are deemed uncollectible. Note that the Company did not elect to use the collateral maintenance agreement practical expedient available under CECL.

Nonaccrual LHFI were as follows:

		Nonaccru Allowance fo		Nonaccrual					
(Dollars in thousands)									
Loans secured by real estate:	M	arch 31, 2023	December 31, 2022		March 31, 2023	D	ecember 31, 2022

Consumer		_	_		53		49		
Total nonaccrual loans	\$	9,825	\$ 8,044	\$	17,078	\$	9,940		

All interest formerly accrued but not received for loans placed on nonaccrual status is reversed from interest income. Subsequent receipts on nonaccrual loans are recorded as a reduction of principal, and interest income is recorded only after principal recovery is reasonably assured. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured. At March 31, 2023, and December 31, 2022, the Company had no funding commitments for loans in which the terms were modified as a result of the borrowers experiencing financial difficulty.

For the three months ended March 31, 2023 and 2022, gross interest income that would have been recorded had the nonaccruing loans been current in accordance with their original terms, was \$136,000 and \$245,000, respectively. No interest income was recorded on these loans while they were considered nonaccrual during the three months ended March 31, 2023 and 2022.

The Company elects the fair value option for recording residential mortgage loans held for sale in accordance with U.S. GAAP. The Company had \$4.6 million of nonaccrual mortgage loans held for sale that were recorded using the fair value option election at March 31, 2023, compared to \$3.9 million at December 31, 2022.

The tables below summarize modifications made to borrowers experiencing financial difficulty by loan and modification type during the dates indicated.

Three Months Ended March 31, 2023							
Term Extension							
Amo	rtized Cost	% of Loans					
\$	2,230	0.09 %					
	3,346	0.35					
	5,576	0.11					
	9,304	0.44					
	_	_					
	<u> </u>	_					
\$	14,880	0.20					
		* 2,230 3,346 5,576 9,304 —					

The following table describes the financial effect of the modification made to 11 borrowers experiencing financial difficulty.

	Three Months Ended March 31, 2023
	Term Extension
Commercial real estate	Added a weighted average 4.1 months to the life of the modified loans
Construction/land/land development	Added a weighted average 4.8 months to the life of the modified loans
Commercial and industrial	Added a weighted average 3.6 months to the life of the modified loans

All the loans that have been modified during the three months ended March 31, 2023, are performing in accordance with modified terms.

There were no loans to borrowers experiencing financial difficulty that defaulted during the three months ended March 31, 2023, that were modified within the last three months. A payment default is defined as a loan that was 90 or more days past due. The Company monitors the performance of modified loans on an ongoing basis. In the event of subsequent default, the allowance for loan credit losses continues to be reassessed on the basis of an individual evaluation of each loan. The modifications made during the periods presented did not significantly impact the Company's determination of the allowance for credit losses.

Note 5 — Fair Value of Financial Instruments

Fair value is the exchange price that is expected to be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Certain assets and liabilities are recorded in the Company's consolidated financial statements at fair value. Some are recorded on a recurring basis and some on a non-recurring basis.

The Company utilizes fair value measurement to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. The determination of fair values of financial instruments often requires the use of estimates. In cases where quoted market values in an active market are not available, the Company utilizes valuation techniques that are consistent with the market approach, the income approach and/or the cost approach to estimate the fair values of its financial instruments. Such valuation techniques are consistently applied.

A hierarchy for fair value has been established, which categorizes the valuation techniques into three levels used to measure fair value. The three levels are as follows:

- Level 1 Fair value is based on unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2 Fair value is based on significant other observable inputs that are generally determined based on a single price for each financial instrument provided to the Company by an unrelated third-party pricing service and is based on one or more of the following:
 - Quoted prices for similar, but not identical, assets or liabilities in active markets;
 - Quoted prices for identical or similar assets or liabilities in markets that are not active;
 - Inputs other than quoted prices that are observable, such as interest rate and yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates; and
 - Other inputs derived from or corroborated by observable market inputs.

Level 3 - Prices or valuation techniques that require inputs that are both significant and unobservable in the market. These instruments are valued using the best information available, some of which is internally developed, and reflects the Company's own assumptions about the risk premiums that market participants would generally require and the assumptions they would use. These estimates can be inherently uncertain.

There were no transfers between fair value reporting levels for any period presented.

Fair Values of Assets and Liabilities Recorded on a Recurring Basis

The following tables summarize financial assets and financial liabilities recorded at fair value on a recurring basis at March 31, 2023, and December 31, 2022, segregated by the level of valuation inputs within the fair value hierarchy utilized to measure fair value. There were no changes in the valuation techniques during 2023 or 2022.

⁽¹⁾ Total mortgage banking revenue includes changes in fair value due to market changes and run-off.

The Company obtains fair value measurements for loans at fair value, securities available for sale and securities at fair value through income from an independent pricing service; therefore, quantitative unobservable inputs are unknown.

The following methodologies were used to measure the fair value of financial assets and liabilities valued on a recurring basis:

Securities Available for Sale

Securities classified as available for sale are reported at fair value utilizing Level 1, Level 2 or Level 3 inputs. For Level 1 securities, the Company obtains the fair value measurements for those identical assets from an independent pricing service. For Level 2 securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, market consensus prepayment speeds, credit information and the security's terms and conditions, among other things. In order to ensure the fair values are consistent with ASC 820, *Fair Value Measurements and Disclosures*, the Company periodically checks the fair value by comparing them to other pricing sources, such as Bloomberg LP. The third-party pricing service is subject to an annual review of internal controls in accordance with the Statement on Standards for Attestation Engagements No. 16, which was made available to the Company. In certain cases where Level 2 inputs are not available, securities are classified within Level 3 of the hierarchy.

Mortgage Servicing Rights ("MSRs")

The carrying amounts of the MSRs equal fair value, which are determined using a discounted cash flow valuation model. The significant assumptions used to value MSRs were as follows:

	March	31, 2023	December 31, 2022				
	Range	Weighted Average ⁽¹⁾	Range	Weighted Average ⁽¹⁾			
Prepayment speeds	7.40% - 8.34%	8.10 %	7.65% - 9.20%	8.11 %			
Discount rates	9.50 - 12.00	9.56	9.50 - 22.07	12.55			

The weighted average was calculated with reference to the principal balance of the underlying mortgages.

Recently there have been significant market-driven fluctuations in the assumptions listed above. These fluctuations can be rapid and may continue to be significant. Typically, loans with higher average coupon rates have a greater likelihood of prepayment during comparatively low interest rate environments, while loans with lower average coupon rates have a lower likelihood of prepayment. The recent increase in rates has caused a decrease in the weighted average prepayment speed. The decrease in the discount rate assumption was mainly due to the sale of GNMA MSR portfolio during the current quarter. Estimating these assumptions within ranges that market participants would use in determining the fair value of MSRs requires significant management judgment.

Derivatives

Fair values for interest rate swap agreements and interest rate lock commitments are based upon the amounts that would be required to settle the contracts. Fair values for risk participations, forward mortgage backed security purchases or loan sale commitments and future contracts to purchase United States treasury notes are based on the fair values of the underlying mortgage loans or securities and the probability of such commitments being exercised. Significant management judgment and estimation is required in determining these fair value measurements.

Fair Values of Assets Recorded on a Recurring Basis for which the Fair Value Option has been Elected

Certain assets are measured at fair value on a recurring basis due to the Company's election to adopt fair value accounting treatment for those assets. This election allows for a more effective offset of the changes in fair values of the assets and the derivative instruments used to economically hedge them without the burden of complying with the requirements for hedge accounting under ASC Topic 815, *Derivatives and Hedging*. For assets for which the fair value has been elected, the earned current contractual interest payment is recognized in interest income, loan origination costs and fees on fair value option loans are recognized in earnings as incurred and not deferred. At March 31, 2023, and December 31, 2022, there were no gains or losses recorded attributable to changes in instrument-specific credit risk. The following tables summarize the difference between the fair value and the unpaid principal balance for financial instruments for which the fair value option has been elected:

	March 31, 2023									
(Dollars in thousands)	Principal Aggregate Fair Value Balance/Amortiz					Difference				
Loans held for sale ⁽¹⁾	\$	29,143	\$	28,536	\$	607				
Securities carried at fair value through income		6,413		7,100		(687)				
Total	\$	35,556	\$	35,636	\$	(80)				

(1) \$4.6 million of loans held for sale were designated as nonaccrual or 90 days or more past due at March 31, 2023. Of this balance, \$2.8 million was guaranteed by U.S. Government agencies.

	December 31, 2022									
				Principal		7.400				
(Dollars in thousands)	Aggr	egate Fair Value	Balance	e/Amortized Cost		Difference				
Loans held for sale ⁽¹⁾	\$	25,389	\$	24,946	\$	443				
Securities carried at fair value through income		6,368		7,100		(732)				
Total	\$	31,757	\$	32,046	\$	(289)				

^{3.9} million of loans held for sale were designated as nonaccrual or 90 days or more past due at December 31, 2022. Of this balance, \$3.3 million was guaranteed by U.S. Government agencies

Changes in the fair value of assets for which the Company elected the fair value option are classified in the consolidated statements of income line items reflected in the following table:

(Dollars in thousands)	Three Months Ended March 31,			Tarch 31,
Changes in fair value included in noninterest income:	2023			2022
Mortgage banking revenue (loans held for sale)	\$	164	\$	(497)
Other income:				
Securities carried at fair value through income		46		(439)
Total fair value option impact on noninterest income (1)	\$	210	\$	(936)

The fair value option impact on noninterest income is offset by the derivative gain/loss recognized in noninterest income. Please see Note 6 — Mortgage Banking for more detail.

The following methodologies were used to measure the fair value of financial assets valued on a recurring basis for which the fair value option was elected:

Securities at Fair Value through Income

Securities carried at fair value through income are valued using a discounted cash flow with a credit spread applied to each instrument based on the creditworthiness of each issuer. Credit spreads ranged from 83 to 227 basis points at both March 31, 2023, and December 31, 2022. The Company believes the fair value approximates an exit price.

Loans Held for Sale

Fair values for loans held for sale are established using anticipated sale prices for loans allocated to a sale commitment, and those unallocated to a commitment are valued based on the interest rate and term for similar loans allocated. The Company believes the fair value approximates an exit price.

Fair Value of Assets Recorded on a Nonrecurring Basis

Equity Securities without Readily Determinable Fair Values

Equity securities without readily determinable fair values totaled \$77.0 million and \$67.4 million at March 31, 2023, and December 31, 2022, respectively, and are shown on the face of the consolidated balance sheets. The majority of the Company's equity investments qualify for the practical expedient allowed for equity securities without a readily determinable fair value, such that the Company has elected to carry these securities at cost adjusted for any observable transactions during the period, less any impairment. To date, no impairment has been recorded on the Company's investments in equity securities that do not have readily determinable fair values.

Government National Mortgage Association Repurchase Asset

The Company recorded \$24.6 million at December 31, 2022, for Government National Mortgage Association ("GNMA") repurchase assets included in loans held for sale on the consolidated balance sheets. There were no GNMA repurchase assets at March 31, 2023. The assets were valued at the lower of cost or market and, where market is lower than cost, valued using anticipated sale prices for loans allocated to a sale commitment, and those unallocated to a commitment are valued based on the interest rate and term for similar loans.

During the second half of 2022, the Company entered into an agreement to sell its GNMA MSR portfolio, which met all final sale conditions in early 2023. The Company sold \$1.8 million in GNMA MSR, with no significant additional gain or loss realized, and derecognized the related GNMA repurchase asset and offsetting liability during the quarter ended March 31, 2023.

Individually Evaluated Loans with Credit Losses

Loans for which it is probable that the Company will not collect all principal and interest due according to contractual terms are measured to determine if any credit loss exists. Allowable methods for determining the amount of credit loss include estimating the fair value using the fair value of the collateral for collateral-dependent loans and a discounted cash flow methodology for other evaluated loans that are not collateral dependent. If the loan is identified as collateral-dependent, the fair value method of measuring the amount of credit loss is utilized. Evaluating the fair value of the collateral for collateral-dependent loans requires obtaining a current independent appraisal of the collateral and applying a discount factor to the value. If the loan is not collateral-dependent, the discounted cash flow method is utilized, which involves assumptions and judgments as to credit risk, prepayment risk, liquidity risk, default rates, loss severity, payment speeds, collateral values and discount rate. Loans that have experienced a credit loss with specific allocated losses are within Level 3 of the fair value hierarchy when the credit loss is determined using the fair value method. The fair value of loans that have experienced a credit loss with specific allocated losses was approximately \$20.8 million and \$20.7 million at March 31, 2023, and December 31, 2022, respectively.

Non-Financial Assets

Foreclosed assets held for sale are the only non-financial assets valued on a non-recurring basis that are initially recorded by the Company at fair value, less estimated costs to sell. At foreclosure, if the fair value, less estimated costs to sell, of the real estate acquired is less than the Company's recorded investment in the related loan, a write-down is recognized through a charge to the allowance for loan credit losses. Additionally, valuations are periodically performed by management, and any subsequent reduction in value is recognized by a charge to income. The carrying value and fair value of foreclosed assets held for sale was estimated using Level 3 inputs based on observable market data and was \$806,000 at both March 31, 2023, and December 31, 2022, respectively. At March 31, 2023, and December 31, 2022, the Company had zero and \$10,000, respectively, in principal amount of residential mortgage loans in the process of foreclosure.

Fair Values of Financial Instruments Not Recorded at Fair Value

Loans

The estimated fair value approximates carrying value for variable-rate loans that reprice frequently and with no significant change in credit risk. The fair value of fixed rate loans and variable-rate loans, which reprice on an infrequent basis, is estimated by discounting future cash flows using exit level pricing, which combines the current interest rates at which similar loans with similar terms would be made to borrowers of similar credit quality and an estimated additional rate to reflect a liquidity premium. An overall valuation adjustment is made for specific credit risks as well as general portfolio credit risk.

Deposits

The estimated fair value approximates carrying value for demand deposits. The fair value of fixed rate deposit liabilities with defined maturities is estimated by discounting future cash flows using the interest rates currently available for funding from the FHLB. The estimated fair value of deposits does not take into account the value of our long-term relationships with depositors, commonly known as core deposit intangibles, which are separate intangible assets, and not considered financial instruments. Nonetheless, the Company would likely realize a core deposit premium if the deposit portfolio were sold in the principal market for such deposits.

Borrowed Funds

The estimated fair value approximates carrying value for short-term borrowings. The fair value of long-term fixed rate and fixed-to-floating-rate borrowings is estimated using quoted market prices, if available, or by discounting future cash flows using current interest rates for similar financial instruments. The estimated fair value approximates carrying value for variable-rate junior subordinated debentures that reprice quarterly.

The carrying value and estimated fair values of financial instruments not recorded at fair value are as follows:

(Dollars in thousands)	March 31, 2023		December 31, 2022			2022	
Financial assets: Level 1 inputs:		Carrying Value	Estimated Fair Value		Carrying Value		Estimated Fair Value
Cash and cash equivalents	\$	825,111	\$ 825,111	\$	358,972	\$	358,972
Level 2 inputs:							
Non-marketable equity securities held in other financial institutions		77,036	77,036		67,378		67,378
GNMA repurchase asset		_	_		24,569		24,569
Accrued interest and loan fees receivable		38,883	38,883		38,136		38,136
Level 3 inputs:

Note 6 — Mortgage Banking

The following table presents the Company's revenue from mortgage banking operations:

(Dollars in thousands)		Three Months Ended March 31,						
Mortgage banking revenue	2	2023	2022					
Origination	\$	111	\$	205				
Gain on sale of loans held for sale		609		1,723				
Originations of MSRs		149		727				
Servicing		989		1,426				
Total gross mortgage revenue		1,858		4,081				
MSR valuation adjustments, net		(906)		4,240				
Mortgage HFS and pipeline fair value adjustment		440		326				
MSR hedge impact		389		(4,551)				
Mortgage banking revenue	\$	1,781	\$	4,096				

Management uses forward-settling mortgage-backed securities and U.S. Treasury futures to mitigate the impact of changes in fair value of MSRs. See *Note 7 — Derivative Financial Instruments* for further information.

Mortgage Servicing Rights

Activity in MSRs was as follows:

(Dollars in thousands)	Three Months Ended March 31,					
	 2023		2022			
Balance at beginning of period	\$ 20,824	\$	16,220			
Addition of servicing rights	149		727			
Sale of GNMA MSR	(1,806)		_			
Valuation adjustment, net of amortization	(906)		4,240			
Balance at end of period	\$ 18,261	\$	21,187			

During the second half of 2022, the Company entered into an agreement to sell its GNMA MSR portfolio, which met all final sale conditions in early 2023. The Company sold \$1.8 million in GNMA MSR, with no significant additional gain or loss realized, and derecognized the related GNMA repurchase asset and offsetting liability during the quarter ended March 31, 2023.

The Company receives annual servicing fee income approximating 0.25% of the outstanding balance of the underlying loans. In connection with the Company's activities as a servicer of mortgage loans, the investors and the securitization trusts have no recourse to the Company's assets for failure of debtors to pay when due.

The Company is potentially subject to losses in its loan servicing portfolio due to loan foreclosures. The Company has obligations to either repurchase the outstanding principal balance of a loan or make the purchaser whole for the economic benefits of a loan if it is determined that the loan sold violated representations or warranties made by the Company and/or the borrower at the time of the sale, which the Company refers to as mortgage loan servicing putback expenses. Such representations and warranties typically include those made regarding loans that had missing or insufficient file documentation and/or loans obtained through fraud by borrowers or other third parties. Putback claims may be made until the loan is paid in full. When a putback claim is received, the Company evaluates the claim and takes appropriate actions based on the nature of the claim. The Company is required by the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation to provide a response to putback claims within 60 of the date of receipt.

At March 31, 2023, and December 31, 2022, the reserve for mortgage loan servicing putback expenses totaled \$185,000 and \$217,000, respectively. There is inherent uncertainty in reasonably estimating the requirement for reserves against future mortgage loan servicing putback expenses. Future putback expenses depend on many subjective factors, including the review procedures of the purchasers and the potential refinance activity on loans sold with servicing released and the subsequent consequences under the representations and warranties.

GNMA optional repurchase programs allow financial institutions to buy back individual delinquent mortgage loans that meet certain criteria from the securitized loan pool for which the institution provides servicing. At the servicer's option, and without GNMA's prior authorization, the servicer may repurchase a delinquent loan for an amount equal to 100% of the remaining principal balance of the loan. This buy-back option is considered a conditional option until the delinquency criteria are met, at which time the option becomes unconditional. When a financial institution is deemed to have regained effective control over these loans under the unconditional buy-back option, the loans can no longer be reported as sold and must be included in the consolidated balance sheets as mortgage loans held for sale, regardless of whether the institution intends to exercise the buy-back option. These loans totaled \$24.6 million at December 31, 2022, and were recorded as mortgage loans held for sale at the lower of cost or fair value with a corresponding liability in FHLB advances and other borrowings on the Company's consolidated balance sheets. The final sale conditions of the GNMA MSR portfolio were met during the quarter ended March 31, 2023, and, accordingly, there were no GNMA repurchase program loans on the balance sheet at March 31, 2023.

Note 7 — Derivative Financial Instruments

Risk Management Objective of Using Derivatives

The Company enters into derivative financial instruments to manage risks related to differences in the amount, timing, and duration of the Company's known or expected cash receipts and its known or expected cash payments, as well as to manage changes in fair values of some assets which are marked at fair value through the consolidated statement of income on a recurring basis.

Cash Flow Hedges of Interest Rate Risk

The Company is a party to interest rate swap agreements under which the Company receives interest at a variable rate and pays at a fixed rate. The derivative instruments represented by these swap agreements are designated as cash flow hedges of the Company's forecasted variable cash flows under a variable-rate term borrowing agreements. During the terms of the swap agreements, the effective portion of changes in the fair value of the derivative instruments are recorded in accumulated other comprehensive (loss) income and subsequently reclassified into earnings in the periods that the hedged forecasted variable-rate interest payments affected earnings. There was no ineffective portion of the change in fair value of the derivatives recognized directly in earnings. The entire swap fair value will be reclassified into earnings before the expiration dates of the swap agreements.

Derivatives Not Designated as Hedges

Customer interest rate derivative program

The Company offers certain derivatives products, primarily interest rate swaps, directly to qualified commercial banking customers to facilitate their risk management strategies. In most instances, the Company acts only as an intermediary, simultaneously entering into offsetting agreements with unrelated financial institutions, thereby mitigating its net risk exposure resulting from such transactions without significantly impacting its results of operations. Because the interest rate derivatives associated with this program do not meet hedge accounting requirements, changes in the fair value of both the customer derivatives and any offsetting derivatives are recognized directly in earnings as a component of noninterest income.

From time to time, the Company shares in credit risk on interest rate swap arrangements, by entering into risk participation agreements with syndication partners. These are accounted for at fair value and disclosed as risk participation derivatives.

Mortgage banking derivatives

The Company enters into certain derivative agreements as part of its mortgage banking and related risk management activities. These agreements include interest rate lock commitments on prospective residential mortgage loans and forward commitments to sell these loans to investors on a mandatory delivery basis. The Company also economically hedges the value of MSRs by entering into a series of commitments to purchase mortgage-backed securities in the future and U.S. Treasury future contracts.

Fair Values of Derivative Instruments on the Consolidated Balance Sheets

The following tables disclose the fair value of derivative instruments in the Company's consolidated balance sheets at March 31, 2023, and December 31, 2022, as well as the effect of these derivative instruments on the Company's consolidated statements of income for the three months ended March 31, 2023 and 2022. Derivative instruments and their related gains and losses are reported in other operating activities, net in the statements of cash flows

(Dollars in thousands)		Notional .	Amo	ounts ⁽¹⁾	Fair Values				
Derivatives designated as cash flow hedging instruments:	March 31, 2023			ecember 31, 2022	March 31, 2023			December 31, 2022	
Interest rate swaps included in other assets	\$	10,500	\$	\$ 10,500		872	\$	1,043	
Derivatives not designated as hedging instruments:									
Interest rate swaps included in other assets	\$	349,093	\$	352,842	\$	20,280	\$	25,482	
Interest rate swaps included in other liabilities		341,993		345,742		(19,966)		(25,175)	
Risk participation agreements included in other assets		20,000		59,738		5		_	
Forward commitments to purchase forward-settling mortgage- backed securities included in other assets		10,000		7,000		142		(100)	
Forward commitments to purchase treasury notes in other assets		15,000		31,500		457		_	
Forward commitments to sell residential mortgage loans included in other liabilities		14,900		8,500		(103)		7	
Interest rate-lock commitments on residential mortgage loans included in other assets		23,013		9,544		587		201	
	\$	773,999	\$	814,866	\$	1,402	\$	415	

Notional or contractual amounts, which represent the extent of involvement in the derivatives market, are used to determine the contractual cash flows required in accordance with the terms of the agreement. These amounts are typically not exchanged, significantly exceed amounts subject to credit or market risk and are not reflected in the consolidated balance sheets.

The weighted-average rates paid and received for interest rate swaps at March 31, 2023, and December 31, 2022, were as follows:

		Weighted-Average	Interest Rate	
	March 31	, 2023	December 3	31, 2022
Interest rate swaps:	Paid	Received	Paid	Received
Cash flow hedges	5.31 %	6.38 %	4.98 %	5.72 %
Non-hedging interest rate swaps - financial institution counterparties	4.28	6.85	3.72	5.75
Non-hedging interest rate swaps - customer counterparties	6.85	4.28	5.75	3.72

Gains and losses recognized on derivative instruments not designated as hedging instruments are as follows:

(Dollars in thousands)	Three Months I	Ended March 31,	
Derivatives not designated as hedging instruments:	2023	2022	
Amount of gain (loss) recognized in mortgage banking revenue (1)	\$ 665	\$	(2,407)
Amount of gain recognized in other non-interest income	11		286

⁽¹⁾ Gains and losses on these instruments are largely offset by market fluctuations in mortgage servicing rights. See Note 6 — Mortgage Banking for more information on components of mortgage banking revenue.

Some interest rate swaps included in other assets were subject to a master netting arrangement with the counterparty in all periods presented and could be offset against some amounts included in interest rate swaps included in other liabilities. The Company has chosen not to net these exposures in the consolidated balance sheets, and any impact of netting these amounts would not be significant.

At March 31, 2023, and December 31, 2022, the Company had cash collateral on deposit with swap counterparties totaling \$6.7 million and \$7.6 million, respectively. These amounts are included in interest-bearing deposits in banks in the consolidated balance sheets and are considered restricted cash until such time as the underlying swaps are settled.

Note 8 — Stock and Incentive Compensation Plans

The Company has granted, and currently has outstanding, stock and incentive compensation awards subject to the provisions of the Company's 2012 Stock Incentive Plan (the "2012 Plan"). The 2012 Plan is designed to provide flexibility to the Company regarding its ability to motivate, attract and retain the services of key officers, employees and directors. The 2012 Plan allows the Company to make grants of incentive stock options, non-qualified stock options, stock appreciation rights, restricted stock awards ("RSA"), restricted stock units ("RSU"), dividend equivalent rights, performance stock units ("PSU") or any combination thereof. At March 31, 2023, the maximum number of shares of the Company's common stock available for issuance under the 2012 Plan was 87,536 shares.

Additionally, the Company's stockholders approved an employee stock purchase plan ("ESPP") which qualified as an ESPP under IRS guidelines. The ESPP provides for the purchase of up to an aggregate one million shares of the Company's common stock by employees, and the total number of shares available for issuance at March 31, 2023, was 973,911. Under the ESPP, employees of the Company, who elect to participate, have the right to purchase a limited number of shares of the Company's common stock at a 15% discount from the lower of the market value of the common stock at the beginning or the end of each one year offering period, beginning on June 1st. The ESPP benefit is treated as compensation to the employee, and the compensation expense will be recognized over the service period based on the fair value of the rights on the grant date, adjusted for forfeitures and certain modifications.

There were no ESPP shares purchased during the three months ended March 31, 2023 or 2022.

The Compensation Committee ("Committee") has approved and the Company has granted PSUs to select officers and employees under the 2012 Plan. Each PSU represents a right for the participant to receive shares of Company common stock or cash equal to the fair market value of such stock, as determined by the Committee. The number of PSUs to which the participant may be entitled will vary from 0% to 150% of the target number of PSUs, based on the Company's achievement of specified performance criteria during the performance period compared to performance benchmarks adopted by the Committee and, further, the participant's continuous service with the Company through the third anniversary of the date of the grant. Each performance period commences on January 1 and ends three years later on December 31, ("Performance Period").

On December 13, 2022, (the "Grant Date"), the Company granted a special, one-time stock award to Drake Mills (the "One-Time Award"), having an approximate value of \$10.0 million, which was comprised of 129,736 restricted stock units ("CEO RSUs") and 129,735 market-based performance stock units ("CEO PSUs"), The CEO RSUs vest in five approximately equal installments on each of the third, fourth, fifth, sixth and seventh anniversaries of the Grant Date, subject to Mr. Mills' continued employment with the Company on each respective vesting date, or upon the earlier occurrence of Mr. Mills' death, disability, termination of employment without cause or resignation for good reason. The CEO PSUs are eligible to vest based on achievement of five pre-established stock price hurdles (each, a "Stock Price Hurdle") during a seven-year performance period (the "CEO Performance Period"), which Stock Price Hurdle must be maintained for twenty consecutive days during the CEO performance period. Each of the five tranches of CEO PSUs will vest on the later of the date that the applicable Stock Price Hurdle is achieved or the third, fourth, fifth, sixth and seventh anniversaries of the Grant Date, respectively, subject to Mr. Mills' continued employment with the Company on each respective vesting date, or upon the earlier occurrence of Mr. Mills' death or disability. The One-Time Award was granted pursuant to, and subject to the terms and conditions of, the Origin Bancorp, Inc. 2012 Stock Incentive Plan and the Company's form of RSU agreement and PSU agreement, respectively.

Compensation expense for the CEO PSUs will be recognized over the vesting period of the awards based on the fair value of the award at the grant date determined by using a Monte Carlo simulation model with the following inputs:

Simulation Inputs

Grant date	December 13, 2022
Performance period	seven years
Stock price	\$ 36.87
Expected volatility (1)	33.0 %
Risk-free rate (2)	3.5

⁽¹⁾ The expected volatility was determined based on the historical volatilities of the Company and the specified peer group.

Share-based compensation cost charged to income for the three months ended March 31, 2023 and 2022, is presented below. There was no stock option expense for any of the periods shown.

	Three Months Ended March 31							
(Dollars in thousands)	 2023		2022					
RSA & RSU	\$ 1,022	\$	611					
PSU	293		46					
ESPP	76		80					
Total stock compensation expense	\$ 1,391	\$	737					
Related tax benefits recognized in net income	\$ 292	\$	155					

Restricted Stock and Performance Stock Grants

The Company's RSAs and RSUs are time-vested awards and are granted to the Company's Board of Directors, executives and senior management team. The service period in which time-vested awards are earned ranges from one to seven years. Time-vested awards are valued utilizing the fair value of the Company's stock at the grant date. These awards are recognized on the straight-line method over the requisite service period, with forfeitures recognized as they occur.

⁽²⁾ The risk-free interest rate for the performance period was derived from the seven-year continuous U.S. Treasury Yield constant maturity curve on the valuation date.

The Company's PSU awards, excluding the CEO PSUs, are three-year cliff-vested awards, with each unit divided into two categories ("ROAA Unit Group" and "ROAE Unit Group"), composed of an equivalent number of initial PSUs granted. The PSUs do not reflect potential increases or decreases resulting from the interim performance results until the final performance results are determined at the end of the three-year period. The ROAA Unit Group is based upon the Company's Performance Period Return on Average Assets performance, and the ROAE Unit Group is based upon the Company's Performance Period Return on Average Equity performance. The PSUs are initially valued utilizing the fair value of the Company's stock at the grant date, assuming 100% of the target number of units are achieved. Subsequent valuation of the PSUs is determined using the ratio of the actual Company's Performance Period ROAA or ROAE to the Company's targeted Performance Period ROAA or ROAE, applied to the PSUs awarded times the Company's closing month end stock price for the month immediately preceding the period end date. Forfeitures are recognized as they occur.

The following table summarizes the Company's award activity:

			Three Months E	inded March 31,		
	20	023		20)22	
	Shares	We	eighted Average Grant- Date Fair Value	Shares	W	eighted Average Grant- Date Fair Value
Nonvested RSAs, January 1,	27,391	\$	35.37	48,048	\$	35.27
Vested RSAs	(12,840)		37.39			_
Nonvested RSAs, March 31,	14,551		33.59	48,048		35.27
Nonvested RSUs, January 1,	270,390	\$	39.63	73.977	2	40.64
Granted RSUs	65,842	Ψ	40.69	40,475	Ψ	44.77
Vested RSUs	(12,005)		44.77	-		_
Forfeited RSUs	(1,357)		41.41	(743)		40.40
Nonvested RSUs, March 31,	322,870		39.65	113,709		42.11
Nonvested PSUs, January 1,	157,367	\$	29.06	_	\$	_
Granted PSUs	43,591		37.91	27,632		44.77
Forfeited PSUs	(1,592)		37.91			_
Nonvested PSUs, March 31,	199,366		30.50	27,632		44.77

At March 31, 2023, there was \$269,000, \$11.4 million and \$5.2 million of total unrecognized compensation cost related to nonvested RSA shares, RSU shares and PSU shares under the 2012 Plan, respectively. Those costs are expected to be recognized over a weighted-average period of 0.6, 4.1 and 2.6 years for RSA, RSU and PSU shares, respectively.

Stock Option Grants

The Company has previously issued common stock options to select officers and employees primarily through individual agreements. The exercise price of each option varies by agreement and is based on the fair value of the stock at the date of the grant. No outstanding stock option has a term that exceeds twenty years, and all of the outstanding options are fully vested. The Company recognized compensation cost for stock option grants over the required service period based upon the grant date fair value, which is established using a Black-Scholes valuation model. The Black-Scholes valuation model uses assumptions of risk-free interest rate, expected term of stock options, expected stock price volatility and expected dividends. Forfeitures are recognized as they occur.

In conjunction with the BTH merger, the Company assumed the BTH 2012 Equity Incentive Plan and converted all outstanding options to purchase BTH common stock into options to purchase an aggregate of 611,676 shares of the Company's common stock. Under the terms of applicable change in control provisions within the BTH 2012 Equity Incentive Plan and BTH Notice Of Stock Option Award, all BTH stock options fully vested immediately prior to the closing of the merger that occurred on August 1, 2022. BTH converted options have no expiration dates past August 16, 2031, and no further grants will be made under the BTH 2012 Equity Incentive Plan.

The table below summarizes the status of the Company's stock options and changes during the years ended March 31, 2023 and 2022.

(Dollars in thousands, except per share amounts) Three Months Ended March 31, 2023	Number of Shares	_	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value

Note 10 — Capital and Regulatory Matters

The Company (on a consolidated basis) and the Bank is subject to various regulatory capital requirements administered by federal and state banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

The Company is subject to the Basel III regulatory capital framework ("Basel III Capital Rules"), which includes a 2.5% capital conservation buffer. The capital conservation buffer is designed to absorb losses during periods of economic stress and requires increased capital levels for the purpose of capital distributions and other payments. Failure to meet the full amount of the buffer will result in restrictions on the Company's ability to make capital distributions, which include dividend payments, stock repurchases and to pay discretionary bonuses to executive officers.

Quantitative measures established by regulation to ensure capital adequacy require the Company and Origin to maintain minimum amounts and ratios (set forth in the table below) of total, common equity Tier 1 capital, Tier 1 capital, Tier 1 capital, and total capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier 1 capital (as defined) to average total consolidated assets (as defined). Management believes, at March 31, 2023, and December 31, 2022, that the Company and Origin met all capital adequacy requirements to which they are subject, including the capital buffer requirement.

At March 31, 2023, and December 31, 2022, Origin's capital ratios exceeded those levels necessary to be categorized as "well capitalized" under the regulatory framework for prompt corrective action. To be categorized as "well capitalized," Origin must maintain minimum total risk-based, common equity Tier 1 capital, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the table below. A final rule adopted by the federal banking agencies in February 2019 provides banking organizations with the option to phase in, over a three-year period, the adverse day-one regulatory capital effects of the adoption of CECL. In addition, on March 27, 2020, the federal banking agencies issued an interim final rule that gives banking organizations that were required to implement CECL before the end of 2020 the option to delay for two years CECL's adverse effects on regulatory capital. Origin elected to adopt CECL in the first quarter of 2020 and exercised the option to delay the estimated impact of the adoption of CECL on the Company's regulatory capital for two years (from January 2020 through December 31, 2021). The two-year delay is followed by a three-year transition period of CECL's initial impact on the Company's regulatory capital (from January 1, 2022, through December 31, 2024). The amount representing the CECL impact to the Company's regulatory capital that will be ratably transitioning back into regulatory capital over the transition period is \$4.5 million and \$5.1 million at March 31, 2023, and December 31, 2022, respectively.

The actual capital amounts and ratios of the Company and Origin at March 31, 2023, and December 31, 2022, are presented in the following table:

(Dollars in thousands) March 31, 2023	Actu	ıal	Minimum Capi Basel		To be Well Capit Prompt Correc Provisi	ctive Action	
Common Equity Tier 1 Capital to Risk-Weighted Assets	Amount	Ratio	Amount	Ratio	Amount	Ratio

Origin Bank	952,579	9.94	383,359	4.00	479,198	5.00	

In the ordinary course of business, the Company depends on dividends from the Bank to provide funds for the payment of dividends to stockholders and to provide for other cash requirements. Banking regulations may limit the amount of dividends that may be paid. Approval by regulatory authorities is required if the effect of dividends declared would cause the regulatory capital of the Bank to fall below specified minimum levels. Approval is also required if dividends declared and paid exceed the Bank's year-to-date net income combined with the retained net income for the preceding year, which was \$105.6 million at March 31, 2023.

Stock Repurchases

In July 2022, the Board of Directors of the Company authorized a stock repurchase program pursuant to which the Company may, from time to time, purchase up to \$50 million of its outstanding common stock. The shares may be repurchased in the open market or in privately negotiated transactions from time to time, depending upon market conditions and other factors, and in accordance with applicable regulations of the Securities and Exchange Commission. The stock repurchase program is intended to expire in three years but may be terminated or amended by the Board of Directors at any time. The stock repurchase program does not obligate the Company to purchase any shares at any time.

There have been no stock repurchases during the three months ended March 31, 2023 or 2022.

Note 11 — Commitments and Contingencies

Credit-Related Commitments

In the ordinary course of business, the Company enters into financial instruments, such as commitments to extend credit and letters of credit, to meet the financing needs of its customers. Such instruments are not reflected in the accompanying consolidated financial statements until they are funded, although they expose the Company to varying degrees of credit risk and interest rate risk in much the same way as funded loans.

Commitments to extend credit include revolving commercial credit lines, non-revolving loan commitments issued mainly to finance the merger and development or construction of real property or equipment, and credit card and personal credit lines. The availability of funds under commercial credit lines and loan commitments generally depends on whether the borrower continues to meet credit standards established in the underlying contract and has not violated other contractual conditions. Loan commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee by the borrower. Credit card and personal credit lines are generally subject to cancellation if the borrower's credit quality deteriorates. A number of commercial and personal credit lines are used only partially or, in some cases, not at all before they expire, and the total commitment amounts do not necessarily represent future cash requirements of the Company.

A substantial majority of the letters of credit are standby agreements that obligate the Company to fulfill a customer's financial commitments to a third party if the customer is unable to perform. The Company issues standby letters of credit primarily to provide credit enhancement to its customers' other commercial or public financing arrangements and to help them demonstrate financial capacity to vendors of essential goods and services.

The contract amounts of these instruments reflect the Company's exposure to credit risk. The Company undertakes the same credit evaluation in making loan commitments and assuming conditional obligations as it does for on-balance sheet instruments and may require collateral or other credit support.

The table below presents the Company's commitments to extend credit by commitment expiration date for the dates indicated:

(Dollars in thousands) March 31, 2023	Less than One Year		One-Three Years		Three-Five Years		Greater than Five Years		Total
Commitments to extend credit ⁽¹⁾	\$	1,104,066	\$	1,007,729	\$	467,079	\$	69,962	\$ 2,648,836
Standby letters of credit		60,916		1,224		32,987		_	95,127
Total off-balance sheet commitments	\$	1,164,982	\$	1,008,953	\$	500,066	\$	69,962	\$ 2,743,963
December 31, 2022									
Commitments to extend credit ⁽¹⁾	\$	1,093,744	\$	988,212	\$	553,069	\$	96,783	\$ 2,731,808
Standby letters of credit		86,922		2,264					89,186
Total off-balance sheet commitments	\$	1,180,666	\$	990,476	\$	553,069	\$	96,783	\$ 2,820,994

⁽¹⁾ Includes \$637.3 million and \$594.6 million of unconditionally cancellable commitments at March 31, 2023, and December 31, 2022, respectively.

At March 31, 2023, the Company held 29 unfunded letters of credit from the FHLB totaling \$328.2 million, with expiration dates ranging from April 18, 2023, to September 22, 2027. At December 31, 2022, the Company held 28 unfunded letters of credit from the FHLB totaling \$277.4 million, with expiration dates ranging from January 14, 2023, to September 22, 2027.

The Company has a total contingent liability of \$3.1 million as of March 31, 2023, for retention bonuses and guaranteed minimum incentives. The contingent liability consists of retention bonuses totaling \$1.0 million for former BTH employees, with \$523,000, or 50%, due at December 31, 2023, and the remaining \$523,000, or 50%, due at December 31, 2024. Additionally, the Company will pay \$2.0 million, in total, in guaranteed minimum incentives to certain employees, with approximately 42% due on or about December 31, 2023, and 29% each due on or about December 31, 2024 and 2025, respectively. In all cases, continued employment through the payout date is required in order to receive the compensation.

In conjunction with the December 31, 2021, acquisitions of the Lincoln Agency, LLC and Pulley-White Insurance Agency, Inc., the Company has a total fair value contingent liability of \$1.5 million as of March 31, 2023. The amount is payable if Davison Insurance Agency, LLC, the acquirer and surviving wholly-owned subsidiary of the Company, meets certain revenue growth objectives over three years. The fair value and probability of payout of this liability is reassessed annually at the fiscal year end of the Company.

Management establishes an asset-specific allowance for certain lending-related commitments and computes a formula-based allowance for performing consumer and commercial lending-related commitments. These are computed using a methodology similar to that used for the commercial loan portfolio, modified for expected maturities and probabilities of drawdown. The reserve for lending-related commitments was \$4.6 million at both March 31, 2023, and December 31, 2022, respectively, and is included in accrued expenses and other liabilities in the accompanying consolidated balance sheets.

Loss Contingencies

From time to time, the Company is also party to various legal actions arising in the ordinary course of business. At this time, management does not expect that loss contingencies, if any, arising from any such proceedings, either individually or in the aggregate, would have a material adverse effect on the consolidated financial position or liquidity of the Company.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Unless the context indicates otherwise, references in this report to "we," "us," "our," "our company," "the Company" or "Origin" refer to Origin Bancorp, Inc., a Louisiana corporation, and its consolidated subsidiaries. All references to "Origin Bank" or "the Bank" refer to Origin Bank our wholly-owned bank subsidiary.

The following discussion and analysis presents our financial condition and results of operations on a consolidated basis. However, we conduct all of our material business operations through our wholly-owned bank subsidiary, Origin Bank, the discussion and analysis that follows primarily relates to activities conducted at the Bank level.

The following discussion and analysis should be read in conjunction with our unaudited consolidated financial statements and related condensed notes contained in Item 1 of this report. To the extent that this discussion describes prior performance, the descriptions relate only to the periods listed, which may not be indicative of our future financial outcomes. In addition to historical information, this discussion contains forward-looking statements that involve risks, uncertainties and assumptions that could cause results to differ materially from management's expectations. Factors that could cause such differences are discussed in the sections titled "Cautionary Note Regarding Forward-Looking Statements" and "Item 1A. Risk Factors" and in the section titled "Risk Factors" in our 2022 Form 10-K. We assume no obligation to update any of these forward-looking statements.

General

We are a financial holding company headquartered in Ruston, Louisiana. Origin's wholly owned bank subsidiary, Origin Bank, was founded in 1912 in Choudrant, Louisiana. Deeply rooted in Origin's history is a culture committed to providing personalized, relationship banking to businesses, municipalities, and personal clients to enrich the lives of the people in the communities it serves. Origin provides a broad range of financial services and currently operates 60 banking centers located from Dallas/Fort Worth, East Texas and Houston, across North Louisiana and into Mississippi. As a financial holding company operating through one segment, we generate the majority of our revenue from interest earned on loans and investments, service charges and fees on deposit accounts.

We incur interest expense on deposits and other borrowed funds and noninterest expense, such as salaries and employee benefits and occupancy expenses. We analyze our ability to maximize the income generated from interest-earning assets and minimize expense of our liabilities through our net interest margin. Net interest margin is a ratio calculated as net interest income divided by average interest-earning assets. Net interest income is the difference between interest income on interest-earning assets, such as loans, securities and interest-bearing cash, and interest expense on interest-bearing liabilities, such as deposits and borrowings. Net interest spread is the average yield on interest-earning assets minus the average rate on interest-bearing liabilities.

Changes in market interest rates and the interest rates we earn on interest-earning assets or pay on interest-bearing liabilities, as well as in the volume and types of interest-earning assets, interest-bearing and noninterest-bearing liabilities, and stockholders' equity, are usually the largest drivers of periodic changes in net interest spread, net interest margin and net interest income.

2023 First Quarter Highlights

- Total loans held for investment ("LHFI"), excluding mortgage warehouse lines of credit, were \$7.04 billion at March 31, 2023, reflecting an increase of \$233.1 million, or 3.4%, compared to December 31, 2022.
- Total deposits were \$8.17 billion at March 31, 2023, reflecting an increase of \$398.6 million, or 5.1%, compared to December 31, 2022.
- Book value per common share was \$32.25 at March 31, 2023, reflecting an increase of \$1.35, or 4.4%, compared to December 31, 2022.
- Total nonperforming LHFI to total LHFI was 0.23% at March 31, 2023, compared to 0.14% at December 31, 2022. The allowance for loan credit losses ("ALCL") to nonperforming LHFI was 538.75% at March 31, 2023, compared to 876.87% at December 31, 2022.
- At March 31, 2023, and December 31, 2022, Company level common equity Tier 1 capital to risk-weighted assets was 11.08%, and 10.93%, respectively, the Tier 1 leverage ratio was 9.79% and 9.66%, respectively, and the total capital ratio was 14.30% and 14.23%, respectively.

• LHFI, excluding mortgage warehouse lines of credit, to deposits was 86.1% at March 31, 2023, compared to 87.5% at December 31, 2022. Cash and liquid securities as a percentage of total assets was 14.3% at March 31, 2023, compared to 12.1% at December 31, 2022.

Recent Developments

During the first quarter of 2023, the banking industry experienced significant volatility with multiple high-profile bank failures and industry wide concerns related to liquidity, deposit outflows, uninsured deposit concentrations, unrealized securities losses and eroding consumer confidence in the banking system. Despite these negative industry developments, the Company's liquidity position and balance sheet remains strong. The Company's total deposits increased by approximately 5.1% compared to December 31, 2022, to \$8.17 billion at March 31, 2023, primarily due to increases of \$284.6 million and \$228.4 million in brokered deposits and money market deposits, respectively, which was partially offset by a \$234.7 million decrease in noninterest-bearing deposits. The Company's uninsured/uncollateralized deposits totaled \$3.09 billion at March 31, 2023, compared to \$3.43 billion at December 31, 2022, representing 37.8% and 44.1% of total deposits at March 31, 2023, and December 31, 2022, respectively. The Company also took a number of preemptive actions, which included pro-active outreach to clients and actions to maximize its funding sources in response to these recent developments, including the Company's strategic decision to borrow approximately \$700.0 million and hold excess cash for contingency liquidity for the majority of the month ended March 31, 2023. Furthermore, the Company's capital remains strong with common equity Tier 1 and total capital ratios of 11.08% and 14.30%, respectively, as of March 31, 2023.

Comparison of Results of Operations for the Three Months Ended March 31, 2023 and 2022

Our net income increased \$3.6 million, or 17.5%, to \$24.3 million for the three months ended March 31, 2023, from \$20.7 million for the three months ended March 31, 2022. On a diluted earnings per share basis, our earnings were \$0.79 per share for the three months ended March 31, 2023, compared to \$0.87 per share for the three months ended March 31, 2022.

Net Interest Income and Net Interest Margin

Net interest income for the three months ended March 31, 2023, was \$77.1 million, an increase of \$24.6 million, or 46.9%, compared to the three months ended March 31, 2022. Increases in interest rates drove a \$40.7 million net increase in total interest income, while increases in average interest-earning assets drove a \$21.1 million increase in total interest income. Total interest expense increased \$37.2 million compared to the three months ended March 31, 2022, with rate increases driving a \$35.0 million increase in total interest expense and average interest-bearing liabilities contributing another \$2.3 million to the total increase in interest expense. Total impact from purchase accounting treatment on total net interest income was \$1.7 million for the three months ended March 31, 2023, \$1.6 million of which was purchase accounting accretion on acquired loans during the current quarter, with remaining purchase accounting net loan discounts totaling \$629,000 at March 31, 2023.

The Federal Reserve Board sets various benchmark rates, including the Federal Funds rate, and thereby influences the general market rates of interest, including the loan and deposit rates offered by financial institutions. In early 2020, the Federal Reserve lowered the target rate range to 0.00% to 0.25%, which remained in effect throughout all of 2021. On March 17, 2022, the target rate range was increased to 0.25% to 0.50%, then subsequently increased six more times during 2022 and two more times during 2023, with the most recent and current Federal Funds target rate range being set on March 2, 2023, to 4.75% to 5.00%. By March 31, 2023, the Federal Funds target rate range had increased 450 basis points from March 17, 2022, and in order to remain competitive as market interest rates increased, interest rates paid on deposits have also increased. Increases in interest rates contributed \$33.9 million to the total increase in interest income earned on total LHFI during the three months ended March 31, 2023, while interest rates increased our total deposit interest expense by \$30.7 million during the same period.

The Company made a strategic decision to borrow and hold approximately \$700.0 million in excess cash for contingency liquidity for majority of the month ended March 31, 2023. This excess liquidity was held at a weighted-average rate of 5.03% and added \$1.9 million in interest expense for the quarter ended March 31, 2023, which negatively impacted the net interest margin by six basis points.

Table of Contents

The fully tax-equivalent ("FTE") net interest margin ("NIM") was 3.44% for the three months ended March 31, 2023, a 58 basis point increase from the three months ended March 31, 2022. The yield earned on interest-earning assets for the three months ended March 31, 2023, was 5.31%, a 218 basis point increase from 3.13% for the three months ended March 31, 2022. The rate paid on total deposits for the quarter ended March 31, 2023, was 1.75%, an 158 basis point increase from 0.17% for the quarter ended March 31, 2022. The rate paid on FHLB advances and other borrowings also increased to 5.21%, reflecting a 354 basis point increase compared to the three months ended March 31, 2022. The net increase in accretion income due to the BTH merger increased the fully tax-equivalent NIM by approximately eight basis points for the three months ended March 31, 2023. The FTE NIM was impacted by margin compression as rates on interest-bearing liabilities rose faster than yields on interest-earning assets during the current quarter.

The following table presents average balance sheet information, interest income, interest expense and the corresponding average yields earned and rates paid for the three months ended March 31, 2023 and 2022.

⁽¹⁾ Nonaccrual loans are included in their respective loan category for the purpose of calculating the yield earned. All average balances are daily average balances.

Includes Government National Mortgage Association ("GNMA") repurchase average balances of \$4.4 million and \$43.8 million for the three months ended March 31, 2023 and 2022, respectively. The GNMA repurchase asset and liability are recorded as equal offsetting amounts in the consolidated balance sheets, with the asset included in loans held for sale and the liability included in FHLB advances and other borrowings. During the second half of 2022, the Company entered into an agreement to sell its GNMA MSR portfolio, which met all final sale conditions in early 2023. The Company derecognized the related GNMA repurchase asset and offsetting liability during the quarter ended March 31, 2023. For more information on the GNMA repurchase option, see *Note 6 — Mortgage Banking* in the condensed notes to our consolidated financial statements.

⁽³⁾ In order to present pre-tax income and resulting yields on tax-exempt investments comparable to those on taxable investments, a tax-equivalent adjustment has been computed. This adjustment also includes income tax credits received on Qualified School Construction Bonds and income from tax-exempt investments, and tax credits were computed using a federal income tax rate of 21%.

Rate/Volume Analysis

The following table presents the dollar amount of changes in interest income and interest expense for major components of interest-earning assets and interest-bearing liabilities. It distinguishes between the changes related to outstanding balances and those due to changes in interest rates. The change in interest attributable to rate changes has been determined by applying the change in rate between periods to average balances outstanding in the earlier period. The change in interest due to volume has been determined by applying the rate from the earlier period to the change in average balances outstanding between periods. For purposes of this table, changes attributable to both rate and volume that cannot be segregated, including the difference in day count, have been allocated to rate.

	Three Months Ended March 31, 2023 vs. Three Months Ended March 31, 2022							
(Dollars in thousands) Interest-earning assets

Provision for Credit Losses

Net interest income

The provision for credit losses, which includes the provisions for loan credit losses, off-balance sheet commitments credit losses and security credit losses, is based on management's assessment of the adequacy of our allowance for credit losses ("ACL") for loans, securities, and our reserve for off-balance-sheet lending commitments. Factors impacting the provision include inherent risk characteristics in our loan portfolio, the level of nonperforming loans and net charge-offs, both current and historic, local economic and credit conditions, the direction of the change in collateral values, reasonable and supportable forecasts, and the funding probability on unfunded lending commitments. The provision for credit losses is charged against earnings in order to maintain our ACL, which reflects management's best estimate of the life of loan credit losses inherent in our loan portfolio at the balance sheet date, and our reserve for off-balance-sheet lending commitments, which reflects management's best estimate of losses inherent in our legally binding lending-related commitments. The allowance is increased by the provision for loan credit losses and decreased by charge-offs, net of recoveries.

18.894

5.751

24.645

We recorded a provision expense of \$6.2 million for the three months ended March 31, 2023, an increase of \$6.5 million from provision benefit of \$327,000 for the three months ended March 31, 2022. The increase was primarily due to a \$2.18 billion increase in total LHFI from March 31, 2022, \$1.23 billion of the increase was due to the merger with BTH on August 1, 2022. Net charge-offs were \$1.3 million during the quarter ended March 31, 2023, compared to \$1.8 million during the three months ended March 31, 2022, while the allowance for loan credit losses to nonperforming LHFI was 538.75% at March 31, 2023, compared to 293.53% at March 31, 2022, primarily driven by the \$29.8 million increase in the Company's ALCL compared to March 31, 2022. Net charge-offs to total average LHFI (annualized) decreased to 0.07% for the three months ended March 31, 2023, from 0.14% for the three months ended March 31, 2022.

Noninterest Income

Our primary sources of recurring noninterest income are service charges on deposit accounts, mortgage banking revenue, insurance commission and fee income, and other fee income.

The table below presents the various components of and changes in our noninterest income for the periods indicated.

(Dollars in thousands)	Three Months l	Ended N	March 31,		
Noninterest income:	 2023		2022	\$ Change	% Change
Insurance commission and fee income	\$ 7,011	\$	6,456	\$ 555	8.6 %
Service charges and fees	4,571		3,998	573	14.3
Mortgage banking revenue	1,781		4,096	(2,315)	(56.5)
Other fee income	942		598	344	57.5
Swap fee income	384		139	245	N/M
Gain on sales of securities, net	144		_	144	N/M
Limited partnership investment income (loss)	66		(363)	429	118.2
Gain on sales and disposals of other assets, net	63		_	63	N/M
Other income	1,422		982	440	44.8
Total noninterest income	\$ 16,384	\$	15,906	\$ 478	3.0

N/M = Not meaningful.

Noninterest income for the three months ended March 31, 2023, increased by \$478,000, or 3.0%, to \$16.4 million, compared to \$15.9 million for the three months ended March 31, 2022. Most of our noninterest income items increased during the three months ended March 31, 2023, as compared to the three months ended March 31, 2022, except for mortgage banking revenue. The total increase of these noninterest items were \$2.8 million, which was partially offset by a decrease of \$2.3 million in mortgage banking revenue.

Mortgage banking revenue. The \$2.3 million decrease in mortgage banking revenue during the three months ended March 31, 2023, as compared to the three months ended March 31, 2022, was primarily due to a 47.1% reduction in origination volume, a 63.5% reduction in sales volume and a 15.4% reduction in sales margin experienced during the three months ended March 31, 2023.

Noninterest Expense

The following table presents the significant components of noninterest expense for the periods indicated:

(Dollars in thousands)	Three Months 1	Ended Ma	rch 31,		
Noninterest expense:	 2023		2022	\$ Change	% Change
Salaries and employee benefits	\$ 33,731	\$	26,488	\$ 7,243	27.3 %
Occupancy and equipment, net	6,503		4,427	2,076	46.9
Data processing	2,916		2,486	430	17.3
Intangible asset amortization	2,553		537	2,016	N/M
Office and operations	2,303		1,560	743	47.6
Professional services	1,525		1,060	465	43.9
Loan-related expenses	1,465		1,305	160	12.3
Advertising and marketing	1,456		871	585	67.2
Electronic banking	1,009		917	92	10.0

Regulatory assessments	951		626	325	51.9
Communications	384		281	103	36.7
Merger-related expense	_		571	(571)	(100.0)
Other expenses	989		875	114	13.0
Total noninterest expense	\$ 56,760	\$	42,774	\$ 13,986	32.7

N/M = Not meaningful.

Substantially, all expenses increased for the three months ended March 31, 2023, compared the three months ended March 31, 2022, primarily due to the merger with BTH that occurred on August 1, 2022. Noninterest expense for the three months ended March 31, 2023, increased by \$14.0 million, or 32.7%, to \$56.8 million, compared to \$42.8 million for the three months ended March 31, 2022, primarily due to increases of \$7.2 million, \$2.1 million, and \$2.0 million in salaries and employee benefits, occupancy and equipment, net and intangible asset amortization expenses, respectively.

Salaries and employee benefits. The \$7.2 million increase in salaries and employee benefits expenses was primarily driven by an increase in full-time equivalent employees to 1,022 at March 31, 2023, from 827 at March 31, 2022, which was the primary contributor to a \$5.4 million increase in salaries. The BTH merger that closed during the quarter ended September 30, 2022, contributed 98 full-time equivalent employees and \$2.1 million to the increase in salaries alone. Also contributing to the increase was the impact of cost of living adjustments made in August 2022 and annual raises made on March 1, 2023. Additionally, incentive compensation increased \$1.3 million, \$708,000 of which was contributed by the BTH merger.

Occupancy and equipment, net. The \$2.1 million increase in occupancy and equipment expense was primarily due to the BTH merger that closed on August 1, 2022, which contributed \$1.2 million to the total increase. Additionally, the increase was due to the addition of two new banking locations and one mortgage production office being added during the intervening period.

Intangible asset amortization expense. The \$2.0 million increase in intangible asset amortization expense was primarily due to the core deposit intangible established in conjunction with the BTH merger.

Income Tax Expense

For the three months ended March 31, 2023, we recognized income tax expense of \$6.3 million, compared to \$5.3 million for the three months ended March 31, 2022. The effective tax rate for the three months ended March 31, 2023, was 20.5%, compared to 20.3% for the three months ended March 31, 2022.

Our effective income tax rates have historically differed from the applicable U.S. statutory rates of 21% at March 31, 2023, and March 31, 2022, due to the effect of tax-exempt income from securities, low-income housing and qualified school construction bond tax credits, tax-exempt income from life insurance policies and the income tax effects associated with stock-based compensation. These reoccurring tax-exempt items can have a larger than proportional effect on the effective income tax rate as net income decreases. Any changes to the statutory tax rate would change income tax expense in the future.

Comparison of Financial Condition at March 31, 2023, and December 31, 2022

General

Total assets increased by \$672.4 million, or 6.9%, to \$10.36 billion at March 31, 2023, from \$9.69 billion at December 31, 2022. The increase in total assets is primarily due to an increase in interest-bearing deposits in banks which grew \$499.0 million, to \$707.8 million at March 31, 2023, from \$208.8 million at December 31, 2022. Additionally, our loan portfolio balances grew \$285.8 million, to \$7.38 billion at March 31, 2023, from \$7.09 billion at December 31, 2022, resulting in the majority of the remaining increase.

Total deposits increased \$398.6 million to \$8.17 billion at March 31, 2023, from \$7.78 billion at December 31, 2022.

Loan Portfolio

Our loan portfolio is our largest category of interest-earning assets, and interest income earned on our loan portfolio is our primary source of income. At March 31, 2023, 78.2% of the loan portfolio held for investment was comprised of commercial and industrial loans, including mortgage warehouse lines of credit, commercial real estate and construction/land/land development loans, which were primarily originated within our market areas of Texas, North Louisiana, and Mississippi, compared to 78.8% at December 31, 2022.

The following table presents the ending balance of our loan portfolio held for investment at the dates indicated.

(Dollars in thousands)	March	31, 2023	December 31, 2022			2023 vs	. 2022
Real estate:	 Amount	Percent	Amount	Percent		\$ Change	% Change
Commercial real estate	\$ 2,385,400	32.3 %	\$ 2,304,678	32.6 %	\$	80,722	3.5 %
Construction/land/land development	948,626	12.9	945,625	13.3		3,001	0.3
Residential real estate	1,588,491	21.5	1,477,538	20.8		110,953	7.5
Total real estate	 4,922,517	66.7	4,727,841	66.7		194,676	4.1
Commercial and industrial	2,091,093	28.4	2,051,161	28.9		39,932	1.9
Mortgage warehouse lines of credit	337,529	4.6	284,867	4.0		52,662	18.5
Consumer	24,684	0.3	26,153	0.4		(1,469)	(5.6)
Total LHFI	\$ 7,375,823	100.0 %	\$ 7,090,022	100.0 %	\$	285,801	4.0

At March 31, 2023, total LHFI were \$7.38 billion, an increase of \$285.8 million, or 4.0%, compared to \$7.09 billion at December 31, 2022. The increase was primarily driven by loan growth of \$194.7 million in real estate loans. Total LHFI at March 31, 2023, excluding mortgage warehouse lines of credit, was \$7.04 billion, reflecting an increase of \$233.1 million, or 3.4%, increase, compared to December 31, 2022. Our lending focus continues to be on operating companies, including commercial loans and lines of credit, as well as owner-occupied commercial real estate loans.

Loan Portfolio Maturity Analysis

The table below presents the maturity distribution of our LHFI at March 31, 2023. The table also presents the portion of our loans that have fixed interest rates, rather than interest rates that fluctuate over the life of the loans, based on changes in the interest rate environment.

						March 31, 2023

Nonperforming Assets

Nonperforming assets consist of nonperforming loans and property acquired through foreclosures or repossession, as well as bank-owned property not currently in use and listed for sale.

Loans are placed on nonaccrual status when management believes that the borrower's financial condition, after giving consideration to economic and business conditions, and collection efforts, is such that collection of interest is doubtful, or generally when loans are 90 days or more past due. Loans may be placed on nonaccrual status even if the contractual payments are not past due if information becomes available that causes substantial doubt about the borrower's ability to meet the contractual obligations of the loan. When accrual of interest is discontinued, all unpaid accrued interest is reversed. Past due status is based on the contractual terms of the loan. Interest income on nonaccrual loans may be recognized to the extent cash payments are received, but payments received are usually applied to principal. Nonaccrual loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured. If a loan is determined by management to be uncollectible, regardless of size, the portion of the loan determined to be uncollectible is then charged to the allowance for loan credit losses.

Purchased loans that have experienced more than insignificant credit deterioration since origination are purchase credit deteriorated ("PCD") loans. The Company evaluates acquired loans for deterioration in credit quality based on any of, but not limited to, the following: (1) nonaccrual status; (2) borrowers are experiencing financial difficulty which results in modification to the loan terms; (3) risk ratings of special mention, substandard or doubtful; (4) watchlist credits; and (5) delinquency status, including loans that are current on merger/acquisition date, but had been previously delinquent two times 60 days. An allowance for credit losses is determined using the same methodology as other individually evaluated loans. Subsequent changes to the allowance for credit losses are recorded through the provision for credit losses. We held approximately \$44.6 million of unpaid principal balance PCD loans at March 31, 2023, and \$48.1 million of unpaid principal balance PCD loans at December 31, 2022.

We manage the quality of our lending portfolio in part through a disciplined underwriting policy and through continual monitoring of loan performance and borrowers' financial condition. There can be no assurance, however, that our loan portfolio will not become subject to losses due to declines in economic conditions or deterioration in the financial condition of our borrowers.

The following table shows our nonperforming loans and nonperforming assets at the dates indicated:

D_{-1}	1	:	thousands)

(Some in thousands)				
Nonperforming LHFI:	Mar	ch 31, 2023]	December 31, 2022

Ratio of nonperforming assets to average LHFI		0.32		0.25

December 31, 2022, amounts were previously disclosed as troubled debt restructured ("TDR") loans under Accounting Standards Codification 310-40. Accounting Standards Update 2022-02 eliminated the TDR guidance effective for public business entities on January 1, 2023.

At March 31, 2023, total nonperforming LHFI increased by \$7.1 million, or 71.8%, from December 31, 2022. The increase is primarily due to six loan relationships, five of which were acquired relationships. Please see *Note 4 — Loans* to our consolidated financial statements contained in Part I, Item 1 of this report for more information on nonperforming loans.

Table of Contents

Potential Problem Loans

From a credit risk standpoint, we classify loans using risk grades which fall into one of five categories: pass, special mention, substandard, doubtful or loss. The classifications of loans reflect a judgment about the risks of default and loss associated with the loan. We review the ratings on loans and adjust them to reflect the degree of risk and loss that is felt to be inherent or expected in each loan. The methodology is structured, so that reserve allocations are increased in accordance with deterioration in credit quality (and a corresponding increase in risk and loss) or decreased in accordance with improvement in credit quality (and a corresponding decrease in risk and loss). Loans rated special mention reflect borrowers who exhibit credit weaknesses or downward trends deserving close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset or in the bank's credit position at some future date. While potentially weak, no loss of principal or interest is envisioned, and these borrowers currently do not pose sufficient risk to warrant adverse classification. Loans rated substandard are those borrowers with deteriorating trends and well-defined weaknesses that jeopardize the orderly liquidation of debt. A substandard loan is inadequately protected by the current sound worth and paying capacity of the obligor or by the collateral pledged, if any, and where normal repayment from the borrower might be in jeopardy.

Loans rated as doubtful have the weaknesses of substandard assets with the additional characteristic that the weaknesses make collection or liquidation in full questionable, and there is a high probability of loss based on currently existing facts, conditions and values. Loans classified as loss are charged-off, and we have no expectation of the recovery of any payments with respect to loans rated as loss. Information regarding the internal risk ratings of our loans at March 31, 2023, is included in *Note 4 — Loans* to our condensed consolidated financial statements contained in Item 1 of this report.

Allowance for Loan Credit Losses

The allowance for loan credit losses represents the estimated losses for loans accounted for on an amortized cost basis. Expected losses are calculated using relevant information about past events, including historical experience, current conditions, and reasonable and supportable forecasts that affect the collectability of the reported amount. We evaluate LHFI on a pool basis with pools of loans characterized by loan type, collateral, industry, internal credit risk rating and FICO score. We apply a probability of default, loss given default loss methodology, to the loan pools at March 31, 2023. Historical loss rates for each pool are calculated based on charge-off and recovery data beginning with the second quarter of 2012. These loss rates are adjusted for the effects of certain economic variables forecast over a one-year period, particularly for differences between current period conditions and the conditions existing during the historical loss period. Subsequent to the forecast effects, historical loss rates are used to estimate losses over the estimated remaining lives of the loans. The estimated remaining lives consist of the contractual lives, adjusted for estimated prepayments. Loans that exhibit characteristics different from their pool characteristics are evaluated on an individual basis. Certain of these loans are considered to be collateral dependent, with the borrower experiencing financial difficulty. For these loans, the fair value of collateral practical expedient is elected whereby the allowance is calculated as the amount by which the amortized cost exceeds the fair value of collateral, less costs to sell (if applicable). Those individual loans that are not collateral dependent are evaluated based on a discounted cash flow methodology.

The amount of the allowance for loan credit losses is affected by loan charge-offs, which decrease the allowance, recoveries on loans previously charged off, which increase the allowance, as well as the provision for loan credit losses charged to income, which increases the allowance. In determining the provision for loan credit losses, management monitors fluctuations in the allowance resulting from actual charge-offs and recoveries and periodically reviews the size and composition of the loan portfolio in light of current and forecasted economic conditions. If actual losses exceed the amount of the allowance for loan credit losses, it would materially and adversely affect our earnings.

As a general rule, when it becomes evident that the full principal and accrued interest of a loan may not be collected, or at 90 days past due, we will reflect that loan as nonperforming. It will remain nonperforming until it performs in a manner that it is reasonable to expect that we will collect principal and accrued interest in full. When the amount or likelihood of a loss on a loan has been confirmed, a charge-off will be taken in the period it is determined.

We establish general allocations for each major loan category and credit quality. The general allocation is based, in part, on historical charge-off experience and loss given default methodology, derived from our internal risk rating process. Other adjustments may be made to the allowance for pools of loans after an assessment of internal or external influences on credit quality that are not fully reflected in the historical loss or risk rating data. We give consideration to trends, changes in loan mix, delinquencies, prior losses, reasonable and supportable forecasts and other related information.

Table of Contents

In connection with the review of our loan portfolio, we consider risk elements attributable to particular loan types or categories in assessing the quality of individual loans. Some of the risk elements we consider include:

- for commercial real estate loans, the debt service coverage ratio, operating results of the owner in the case of owner-occupied properties, the loan to value ratio, the age and condition of the collateral and the volatility of income, property value and future operating results typical of properties of that type;
- for construction, land and land development loans, the perceived feasibility of the project, including the ability to sell developed lots or improvements constructed for resale or the ability to lease property constructed for lease, the quality and nature of contracts for presale or prelease, if any, experience and ability of the developer and loan to value ratio;
- for residential mortgage loans, the borrower's ability to repay the loan, including a consideration of the debt to income ratio and employment and income stability, the loan-to-value ratio, and the age, condition and marketability of the collateral; and
- for commercial and industrial loans, the debt service coverage ratio (income from the business in excess of operating expenses compared to loan repayment requirements), the operating results of the commercial, industrial or professional enterprise, the borrower's business, professional and financial ability and expertise, the specific risks and volatility of income and operating results typical for businesses in that category and the value, nature and marketability of collateral.

Acquisition Accounting and Acquired Loans. We account for our mergers/acquisitions under Financial Accounting Standards Board ("FASB") ASC Topic 805, Business Combinations, which requires the use of the acquisition method of accounting. All identifiable assets acquired, including loans, are recorded at fair value. In accordance with ASC 326, we record a discount or premium, and also an allowance for credit losses on acquired loans. All purchased loans are recorded at fair value in accordance with the fair value methodology prescribed in FASB ASC Topic 820, Fair Value Measurements. The fair value estimates associated with the loans include estimates related to expected prepayments and the amount and timing of undiscounted expected principal, interest and other cash flows.

Purchased loans that have experienced more than insignificant credit deterioration since origination are PCD loans. An allowance for loan credit losses is determined using the same methodology as other individually evaluated loans. The sum of the loan's purchase price and allowance for credit losses becomes its initial amortized cost basis. The difference between the initial amortized cost basis and the par value of the loan is a non-credit discount or premium, which is amortized or accreted into interest income over the life of the loan. Subsequent changes to the allowance for loan credit losses are recorded through the provision for credit losses.

The ALCL to nonperforming LHFI decreased to 538.8% at March 31, 2023, compared to 876.9% at December 31, 2022, primarily driven by an increase of \$7.1 million in the Company's nonperforming LHFI as explained in the preceding nonperforming assets section, offset by an increase of \$4.8 million in the ALCL for the quarter.

Net charge-offs to total average LHFI (annualized) decreased to 0.07% for the quarter ending March 31, 2023, compared to 0.14% for the three months ended March 31, 2022, almost equally due to the \$2.09 billion increase in average LHFI balances predominately driven by the BTH merger that occurred on August 1, 2022, and the lower net charge-offs during the quarter ended March 31, 2023, compared the three months ended March 31, 2022.

The following table presents an analysis of the allowance for credit losses and other related data at the periods indicated.

(Dollars in thousands)	Three Months	Aarch 31,	Year Ended December 31,		
Allowance for loan credit losses	 2023		2022		2022
Balance at beginning of period	\$ 87,161	\$	64,586	\$	64,586

⁽¹⁾ Includes \$14.9 million provision for loan credit losses for the CECL requirement on non-PCD loans from the BTH merger during the year ended December 31, 2022.

Securities

Our securities portfolio totaled \$1.61 billion at March 31, 2023, representing a decrease of \$50.2 million, or 3.0%, from \$1.66 billion at December 31, 2022. Securities of \$38.7 million, primarily municipal securities, were sold during the three months ending March 31, 2023, and we realized a net gain of \$144,000 on the sale.

Our available for sale portfolio totaled \$1.59 billion at March 31, 2023, and represented 98.9% of our total security portfolio and is comprised of 41.1% mortgage-backed, 22.6% municipal, 15.3% treasury/agency, 11.6% collateralized mortgage obligations and 9.4% corporate/asset-backed securities. Our available for sale portfolio totaled \$1.64 billion at December 31, 2022, and represented 98.9% of our total security portfolio and is comprised of 40.5% mortgage-backed, 23.7% municipal, 15.1% treasury/agency, 11.3% collateralized mortgage obligations and 9.4% corporate/asset-backed securities.

All of our mortgage-backed securities and collateralized mortgage obligations are issued and/or guaranteed by U.S. government agencies or U.S. government-sponsored entities. We do not hold any Fannie Mae or Freddie Mac preferred stock, collateralized debt obligations, collateralized loan obligations, structured investment vehicles, private label collateralized mortgage obligations, subprime, Alt-A, or second lien elements in our investment portfolio. As of March 31, 2023, our investment portfolio did not contain any securities that are directly backed by subprime or Alt-A mortgages.

The securities portfolio had a weighted average effective duration of 4.17 years at March 31, 2023, compared to 4.24 years at December 31, 2022. For additional information regarding our securities portfolio, please see *Note 3*—*Securities* in the condensed notes to our condensed consolidated financial statements contained in Part I, Item 1 of this report.

Deposits

Deposits are the primary funding source used to fund our loans, investments and operating needs. We offer a variety of products designed to attract and retain both consumer and commercial deposit customers. These products consist of noninterest and interest-bearing checking accounts, savings deposits, money market accounts and time deposits. Deposits are primarily gathered from individuals, partnerships and corporations in our market areas. We also obtain deposits from local municipalities and state agencies.

Total deposits increased at March 31, 2023, compared to December 31, 2022, primarily due to increases in brokered and money market deposits which increased by \$284.6 million and \$228.4 million, respectively, partially offset by a decrease in noninterest-bearing demand deposits of \$234.7 million compared to December 31, 2022. During the month of February 2023, we added \$275.0 million of brokered deposits as a less expensive alternative to FHLB advances. Typically, higher interest rates and sustained inflation will cause customers to move liquid asset balances into higher interest-earning vehicles such as money market funds or pay down higher interest-bearing variable rate debt, thereby contributing to tightening liquidity overall.

The following table presents our deposit mix at the dates indicated:

	March	31, 2023		December 31, 2022			December 31, 2022				
(Dollars in thousands)	 Balance	% of Total		Balance	% of Total		\$ Change	% Change			
Noninterest-bearing demand	\$ 2,247,782	27.5	% \$	\$ 2,482,475	32.0 %	\$	(234,693)	(9.5)%			
Money market	2,670,913	32.8		2,442,559	31.4		228,354	9.3			
Interest-bearing demand	1,810,170	22.1		1,737,158	22.3		73,012	4.2			
Time deposits	857,537	10.5		781,880	10.0		75,657	9.7			
Brokered time deposits	289,968	3.5		5,407	0.1		284,561	5,262.8			
Savings	297,940	3.6		326,223	4.2		(28,283)	(8.7)			
Total deposits	\$ 8,174,310	100.0	% \$	\$ 7,775,702	100.0 %	\$	398,608	5.1			

We manage our interest expense on deposits through specific deposit product pricing that is based on competitive pricing, economic conditions and current and anticipated funding needs. We may use interest rates as a mechanism to attract or deter additional deposits based on our anticipated funding needs and liquidity position. We also consider potential interest rate risk caused by extended maturities of time deposits when setting the interest rates in periods of future economic uncertainty.

The following table reflects the classification of our average deposits and the average rate paid on each deposit category for the periods indicated:

	Three Months Ended March 31,												
			2023					2022					
(Dollars in thousands)	 Average Balance	Inte	erest Expense	Average Rate Paid		Average Balance	Inter	est Expense	Average Rate Paid				
Interest-bearing demand	\$ 1,787,927	\$	9,731	2.21 %	\$	1,496,041	\$	698	0.19 %				
Money market	2,557,451		18,071	2.87		2,225,356		1,439	0.26				
Time deposits	827,190		4,577	2.24		535,044		709	0.54				
Brokered time deposits	149,715		1,626	4.40		_		_	0.00				
Savings	303,019		552	0.74		253,998		40	0.06				
Total interest-bearing	 5,625,302		34,557	2.49		4,510,439		2,886	0.26				
Noninterest-bearing demand	2,392,176		_	_		2,218,092		_	_				
Total average deposits	\$ 8,017,478	\$	34,557	1.75	\$	6,728,531	\$	2,886	0.17				

Our average deposit balance was \$8.02 billion for the three months ended March 31, 2023, an increase of \$1.29 billion, or 19.2%, from \$6.73 billion for the three months ended March 31, 2022. The average annualized rate paid on our interest-bearing deposits for the three months ended March 31, 2023, was 2.49%, compared to 0.26% for the three months ended March 31, 2022.

The increase in the average cost of our deposits was primarily the result of the rapidly rising interest rate environment experienced over the last twelve months. Our current deposit rates have not yet completely absorbed all of the market interest rate increases that have occurred during the three months ended March 31, 2023.

Average noninterest-bearing deposits at March 31, 2023, were \$2.39 billion, compared to \$2.22 billion at March 31, 2022, an increase of \$174.1 million, or 7.8%, and represented 29.8% and 33.0% of average total deposits for the three months ended March 31, 2023 and 2022, respectively.

The following table reflects the estimated total amount of uninsured and uncollateralized deposits for the periods indicated:

(Dollars in thousands)	M	Iarch 31, 2023	De	cember 31, 2022
Total deposits	\$	8,174,310	\$	7,775,702
Estimated insured deposits:				
FDIC insured		(3,425,845)		(3,331,724)
FDIC insured reciprocal		(531,051)		(245,621)
FDIC insured brokered time deposits and CDARS		(289,968)		(5,407)
Total estimated FDIC insured deposits	·	(4,246,864)		(3,582,752)
Estimated FDIC uninsured deposits		3,927,446		4,192,950
Collateralized public funds		(839,569)		(762,366)
Estimated uninsured/uncollateralized deposits	\$	3,087,877	\$	3,430,584
Percentage of estimated uninsured/uncollateralized denosits to total denosits	·	37.8 %		44 1 %

Borrowings

Borrowed funds are summarized as follows:

(Dollars in thousands)	March 31, 2023	December 31, 2022
Short-term FHLB advances	\$ 851,901	\$ 550,000
Long-term FHLB advances	6,675	6,740
GNMA repurchase liability	_	24,569
Overnight repurchase agreements with depositors	6,926	27,921
Holding company line of credit	10,000	30,000
Total FHLB advances and other borrowings	\$ 875,502	\$ 639,230
Subordinated indebtedness, net	\$ 201,845	\$ 201,765

Average short-term FHLB advances for the three months ended March 31, 2023, were \$425.5 million compared to \$196.5 million for the year ended December 31, 2022. The Company made a strategic decision to borrow and hold approximately \$700.0 million in excess cash for contingency liquidity for the majority of the month ended March 31, 2023. This excess liquidity was held at a weighted-average rate of 5.03% and added \$1.9 million in interest expense for the quarter ended March 31, 2023, which negatively impacted the fully tax-equivalent net interest margin ("NIM") by six basis points.

At March 31, 2023, we were eligible to borrow an additional \$1.47 billion from the FHLB.

Liquidity and Capital Resources

Overview

Management oversees our liquidity position to ensure adequate cash and liquid assets are available to support our operations and satisfy current and future financial obligations, including demand for loan funding and deposit withdrawals. Management continually monitors, forecasts and tests our liquidity and non-core dependency ratios to ensure compliance with targets established by our Asset-Liability Management Committee and approved by our board of directors.

Management measures our liquidity position by giving consideration to both on-balance sheet and off-balance sheet sources of, and demands for, funds on a daily and weekly basis.

The Company, which is a separate legal entity apart from the Bank, must provide for its own liquidity, including payment of any dividends that may be declared for its common stockholders and interest and principal on any outstanding debt or trust preferred securities incurred by the Company. The cash held at the holding Company is available for general corporate purposes described above, as well as providing capital support to the Bank. In addition, the Company has a line of credit under the terms of which the loan amount shall not exceed an aggregate principal balance of \$100 million, consisting of an initial \$50 million extension of credit and any one or more potential incremental revolving loan amounts that the lender may make in its sole discretion, up to an aggregate principal of \$50 million, upon the request of the Company.

The table below shows the liquidity measures for the Company at the dates indicated:

(Dollars in thousands)	March	31, 2023	December 31, 2022
Available cash balances at the holding company (unconsolidated)	\$	75,544	\$ 99,810
Cash and liquid securities as a percentage of total assets		14.3 %	12.1 %

There are regulatory restrictions on the ability of the Bank to pay dividends under federal and state laws, regulations and policies; please see *Note* 10 — Capital and Regulatory Matters in the notes to our condensed consolidated financial statements for more information on the availability of Bank dividends.

Liquidity Sources

In addition to cash generated from operations, we utilize a number of funding sources to manage our liquidity, including core deposits, investment securities, cash and cash equivalents, loan repayments, federal funds lines of credit available from other financial institutions, as well as advances from the FHLB. We may also use the discount window or the Bank Term Funding Program ("BTFP") at the Federal Reserve Bank ("FRB") as a source of short-term funding.

Core deposits, which are total deposits excluding time deposits greater than \$250,000 and brokered deposits, are a major source of funds used to meet our cash flow needs. Maintaining the ability to acquire these funds as needed in a variety of markets is the key to assuring our liquidity.

Our investment portfolio is another source for meeting our liquidity needs. Monthly payments on mortgage-backed securities are used for short-term liquidity, and our investments are generally traded in active markets that offer a readily available source of cash liquidity through sales, if needed. Securities in our investment portfolio are also used to secure certain deposit types, such as deposits from state and local municipalities, and can be pledged as collateral for other borrowing sources.

Other sources available for meeting liquidity needs include long- and short-term advances from the FHLB and unsecured federal funds lines of credit. Long-term funds obtained from the FHLB are primarily used as an alternative source to fund long-term growth of the balance sheet by supporting growth in loans and other long-term interest-earning assets. We typically rely on such funding when the cost of such borrowings compares favorably to the rates that we would be required to pay for other funding sources, including certain deposits.

We also had unsecured federal funds lines of credit available to us, with no amounts outstanding at either March 31, 2023, or December 31, 2022. These lines of credit primarily provide short-term liquidity and, in order to ensure the availability of these funds, we test these lines of credit at least annually. Interest is charged at the prevailing market rate on federal funds purchased and FHLB advances.

Additionally, at March 31, 2023, we had the ability to borrow \$1.76 billion from the discount window at the Federal Reserve Bank of Dallas ("FRB"), with \$1.52 billion in commercial and industrial loans pledged as collateral. There were no borrowings against this line at March 31, 2023, or December 31, 2022. We also have a line of credit through the FRB's BTFP, with approximately \$384.8 million of investment securities eligible to be pledged at March 31, 2023.

The Company made a strategic decision to borrow approximately \$700.0 million and hold excess cash for contingency liquidity for the majority of the month ended March 31, 2023. This excess liquidity was held at a weighted-average rate of 5.03% and added \$1.9 million in interest expense for the quarter ended March 31, 2023.

Our primary and secondary sources of liquidity totaled \$4.99 billion at March 31, 2023, compared to \$4.34 billion at December 31, 2022. Primary sources of liquidity, which were 82.1% and 77.7%, of our total primary and secondary sources of liquidity at March 31, 2023, and December 31, 2022, respectively, can typically be obtained with 24 hours, while secondary liquidity sources can usually be obtained within seven days.

Our loan to deposit ratio was 90.2% at March 31, 2023, compared to 91.2% at December 31, 2022.

In the normal course of business as a financial services provider, we enter into financial instruments, such as certain contractual obligations and commitments to extend credit and letters of credit, to meet the financing needs of our customers. These commitments involve elements of credit risk, interest rate risk and liquidity risk. Some instruments may not be reflected in our condensed consolidated financial statements until they are funded, and a significant portion of commitments to extend credit may expire without being drawn, although they expose us to varying degrees of credit risk and interest rate risk in much the same way as funded loans. Please see *Note 11 — Commitments and Contingencies* in the condensed notes to our condensed consolidated financial statements for more information on our off balance sheet commitments.

Stockholders' Equity

Stockholders' equity provides a source of permanent funding, allows for future growth and provides a degree of protection to withstand unforeseen adverse developments. Changes in stockholders' equity is reflected below:

(Dollars in thousands)	Stockh	10tal Stockholders' Equity	
Balance at January 1, 2023	\$	949,943	
Net income		24,302	
Other comprehensive income, net of tax		21,394	
Dividends declared - common stock (\$0.15 per share)		(4,678)	
Stock compensation, net		1,626	
Balance at March 31, 2023	\$	992,587	

Please see Part II, Item 2. "Unregistered Sales of Equity Securities and Use of Proceeds" below for information on the Company's stock buy-back program.

Regulatory Capital Requirements

Together with the Bank, we are subject to various regulatory capital requirements administered by federal banking agencies. For further information, these requirements are discussed in greater detail in "Item 1. Business - Regulation and Supervision" included in our 2022 Form 10-K, filed with the SEC. Failure to meet minimum capital requirements may result in certain actions by regulators that, if enforced, could have a direct material effect on our financial statements. At March 31, 2023, and December 31, 2022, we and the Bank were in compliance with all applicable regulatory capital requirements, and the Bank was classified as "well capitalized" for purposes of the prompt corrective action regulations of the Federal Reserve. As we deploy capital and continue to grow operations, regulatory capital levels may decrease depending on the level of earnings. However, we expect to monitor and control growth in order to remain "well capitalized" under applicable regulatory guidelines and in compliance with all applicable regulatory capital standards. While we are currently classified as "well capitalized," an extended economic recession could adversely impact our reported and regulatory capital ratios.

The following table presents our regulatory capital ratios, as well as those of the Bank, at the dates indicated:

(Dollars in thousands)		March 31, 2023		December 31, 2022	
Origin Bancorp, Inc.	<u> </u>	Amount	Ratio	Amount	Ratio
Common equity Tier 1 capital (to risk-weighted assets)	\$	942,363	11.08 % \$	906,859	10.93 %
Tier 1 capital (to risk-weighted assets)		958,110	11.27	922,584	11.12
Total capital (to risk-weighted assets)		1,215,922	14.30	1,180,665	14.23
Tier 1 capital (to average total consolidated assets)		958,110	9.79	922,584	9.66
Origin Bank					
Common equity Tier 1 capital (to risk-weighted assets)	\$	992,417	11.70 % \$	952,579	11.50 %
Tier 1 capital (to risk-weighted assets)		992,417	11.70	952,579	11.50
Total capital (to risk-weighted assets)		1,154,642	13.61	1,109,257	13.39
Tier 1 capital (to average total consolidated assets)		992,417	10.17	952,579	9.94

Critical Accounting Policies and Estimates

SEC guidance requires disclosure of "critical accounting estimates." The SEC defines "critical accounting estimates" as those estimates made in accordance with generally accepted accounting principles that involve a significant level of estimation uncertainty and have had or are reasonably likely to have a material impact on the financial condition or results of operations of the registrant.

Our accounting policies are fundamental to understanding our management's discussion and analysis of our results of operations and financial condition. We have identified certain significant accounting policies which involve a higher degree of judgment and complexity in making certain estimates and assumptions that affect amounts reported in our condensed consolidated financial statements. Please see *Note 1 — Significant Accounting Policies* in the notes to our consolidated financial statements included in the Company's 2022 Form 10-K filed with the SEC for more information about our critical accounting policies and use of estimates.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Interest Rate Sensitivity and Market Risk

As a financial institution, our primary component of market risk is interest rate volatility. Our financial management policy provides management with guidelines for effective funds management and we have established a measurement system for monitoring the net interest rate sensitivity position.

Fluctuations in interest rates will ultimately impact both the level of income and expense recorded on most of our assets and liabilities, and the market value of all interest-earning assets and interest-bearing liabilities, other than those which have a short-term to maturity. Interest rate risk is the potential for economic losses due to future interest rate changes. These economic losses can be reflected as a loss of future net interest income and/or a loss of current fair market values. The objective is to measure the effect on net interest income and to adjust the consolidated balance sheets to minimize the inherent risk while at the same time maximizing income.

We manage exposure to interest rates by structuring the consolidated balance sheets in the ordinary course of business. Additionally, from time to time, we enter into derivatives and futures contracts to mitigate interest rate risk from specific transactions. Based on the nature of operations, we are not subject to foreign exchange or commodity price risk. We have entered into interest rate swaps to mitigate interest rate risk in limited circumstances, but it is not our policy to enter into such transactions on a regular basis.

Our exposure to interest rate risk is managed by the Bank's Asset-Liability Management Committee in accordance with policies approved by the Bank's board of directors. The committee formulates strategies based on appropriate levels of interest rate risk. In determining the appropriate level of interest rate risk, the committee considers the impact on earnings and capital of the current outlook on interest rates, potential changes in interest rates, regional economies, liquidity, business strategies and other factors.

The committee meets regularly to review, among other things, the sensitivity of assets and liabilities to interest rate changes, the book and market values of assets and liabilities, unrealized gains and losses, purchase and sale activities, commitments to originate loans and the maturities of investments and borrowings. Additionally, the committee reviews liquidity, cash flow flexibility, maturities of deposits and consumer and commercial deposit activity. We employ methodologies to manage interest rate risk, which includes an analysis of relationships between interest-earning assets and interest-bearing liabilities, and an interest rate shock simulation model.

We use interest rate risk simulation models and shock analyses to test the interest rate sensitivity of net interest income and fair value of equity, and the impact of changes in interest rates on other financial metrics. Contractual maturities and re-pricing opportunities of loans are incorporated in the model, as are prepayment assumptions, maturity data and call options within the investment portfolio. The average life of non-maturity deposit accounts is based on our balance retention rates using a vintage study methodology. The assumptions used are inherently uncertain, and, as a result, the model cannot precisely measure future net interest income or precisely predict the impact of fluctuations in market interest rates on net interest income. Actual results will differ from the model's simulated results due to timing, magnitude and frequency of interest rate changes as well as changes in market conditions and the application and timing of various management strategies.

On a quarterly basis, we run various simulation models, including a static balance sheet and a dynamic growth balance sheet. These models test the impact on net interest income and fair value of equity from changes in market interest rates under various scenarios. Under the static model, rates are shocked instantaneously and ramped rates change over a twelve-month and twenty-four-month horizon based upon parallel yield curve shifts. Parallel shock scenarios assume instantaneous parallel movements in the yield curve compared to a flat yield curve scenario. Additionally, we run a non-parallel simulation involving analysis of interest income and expense under various changes in the shape of the yield curve. Internal policy regarding interest rate risk simulations currently specifies that for instantaneous parallel shifts of the yield curve, estimated net interest income at risk for the subsequent one-year period should not decline by more than 8.0% for a 100 basis point shift, 15.0% for a 200 basis point shift, 20.0% for a 300 basis point shift, and 25.0% for a 400 basis point shift. We continue to monitor our asset sensitivity and evaluate strategies to prevent being significantly impacted by future changes in interest rates.

The following table summarizes the impact of an instantaneous, sustained simulated change in net interest income and fair value of equity over a 12-month horizon at the date indicated. At March 31, 2023, we aggressively stressed the deposit beta assumptions for the 100 basis points shocks.

	March 31	March 31, 2023			
Change in Interest Rates (basis points)	% Change in Net Interest Income	% Change in Fair Value of Equity			
+400	14.0 %	(5.1)%			
+300	10.4	(4.6)			
+200	7.1	(2.8)			
+100	0.3	(3.4)			
Base					
-100	(1.4)	1.1			
-200	(2.1)	1.6			
-300	(5.1)	0.2			

We have found that, historically, interest rates on deposits change more slowly than changes in the discount and federal funds rates. This assumption is incorporated into the simulation model and is generally not fully reflected in a gap analysis, meaning that process by which we measure the gap between interest rate sensitive assets versus interest rate sensitive liabilities. The assumptions incorporated into the model are inherently uncertain and, as a result, the model cannot precisely measure future net interest income or precisely predict the impact of fluctuations in market interest rates on net interest income. Actual results will differ from the model's simulated results due to timing, magnitude and frequency of interest rate changes, as well as changes in market conditions and the application and timing of various strategies.

Economic conditions and growth prospects are currently impacted by record inflation and recessionary concerns. Increasing interest rates and rising building costs have caused some slowing in the single family housing market. Furthermore, worker shortages especially in the restaurant, hospitality and retail industries, combined with supply chain disruptions impacting numerous industries, and inflationary conditions has had some impact on the level of economic growth. Ongoing higher inflation levels and higher interest rates could have a negative impact on both our consumer and commercial borrowers.

The Federal Reserve Board sets various benchmark rates, including the Federal Funds rate, and thereby influences the general market rates of interest, including the loan and deposit rates offered by financial institutions and the fair value of our available for sale securities. Since March 1, 2022, through March 31, 2023, the Federal Reserve has increased the federal funds target rate range nine times from 25 to 500 basis points, which is the primary reason for the other comprehensive loss we experienced during 2022.

Impact of Inflation

Our financial statements included herein have been prepared in accordance with U.S. GAAP, which presently requires us to measure the majority of our financial position and operating results primarily in terms of historic dollars. Changes in the relative value of money due to inflation or recession are generally not considered.

Unlike most industrial companies, virtually all of the assets and liabilities of a financial institution are monetary in nature. As a result, interest rates have a more significant impact on a financial institution's performance than the general level of inflation. However, inflation affects financial institutions by increasing their cost of goods and services purchased, as well as the cost of salaries and benefits, occupancy expense, and similar items. Inflation and related increases in interest rates generally decrease the market value of investments and loans held and may adversely affect liquidity, earnings, and stockholders' equity. In management's opinion, changes in interest rates affect the financial condition of a financial institution to a far greater degree than changes in the inflation rate. While interest rates are greatly influenced by changes in the inflation rate, they do not necessarily change at the same rate or in the same magnitude as the inflation rate. Interest rates are highly sensitive to many factors that are beyond our control, including changes in the expected rate of inflation, the influence of general and local economic conditions and the monetary and fiscal policies of the United States government, its agencies and various other governmental regulatory authorities.

Table of Contents

Market Risk

Regulators expect banks to transition away from the use of the London Interbank Offered Rate ("LIBOR") as a reference rate. It is expected that the transition away from the widespread use of LIBOR to alternative rates will continue to occur over the course of the next couple months, ahead of the FCA's announced cessation of the remaining LIBOR settings by June 30, 2023. Please see "Item 1A Risk Factors - Risks Related to Our Business" included in the Company's 2022 Form 10-K filed with the SEC for further information.

Item 4. Controls and Procedures

Evaluation of disclosure controls and procedures — As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our design and operation of our disclosure controls and procedures. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management was required to apply judgment in evaluating its controls and procedures. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) were effective as of the end of the period covered by this report.

Our management, including the Chief Executive Officer and Chief Financial Officer, identified no change in our internal control over financial reporting that occurred during the three month period ended March 31, 2023, that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II: OTHER INFORMATION

Item 1. Legal Proceedings

Refer to *Note 11 — Commitments and Contingencies - Loss Contingencies* in the Condensed Notes to Consolidated Financial Statements included in Part I, Item 1 of this report for additional information regarding legal proceedings not reportable under this Item.

Item 1A. Risk Factors

In evaluating an investment in the Company's securities, investors should consider carefully, among other things, the risk factors previously disclosed in Part I, Item 1A of our 2022 Form 10-K.

Other than the risk factor set forth below, there have been no material changes in the risk factors previously disclosed in the 2022 Form 10-K.

Recent negative developments in the banking industry could adversely affect our current and projected business operations and our financial condition and results of operations.

The recent bank failures and related negative media attention have generated significant market trading volatility among publicly traded bank holding companies and, in particular, regional banks like the Company. These developments have negatively impacted customer confidence in regional banks, which could prompt customers to maintain their deposits with larger financial institutions. Further, competition for deposits has increased in recent periods, and the cost of funding has similarly increased, putting pressure on our net interest margin. If we were required to sell a portion of our securities portfolio to address liquidity needs, we may incur losses, including as a result of the negative impact of rising interest rates on the value of our securities portfolio, which could negatively affect our earnings and our capital. If we were required to raise additional capital in the current environment, any such capital raise may be on unfavorable terms, thereby negatively impacting book value and profitability. While we have taken actions to improve our funding, there is no guarantee that such actions will be successful or sufficient in the event of sudden liquidity needs.

We also anticipate increased regulatory scrutiny – in the course of routine examinations and otherwise – and new regulations directed towards banks of similar size to the Bank, designed to address the recent negative developments in the banking industry, all of which may increase the Company's costs of doing business and reduce its profitability. Among other things, there may be an increased focus by both regulators and investors on deposit composition, the level of uninsured deposits, losses embedded in the held-to-maturity portion of our securities portfolio, contingent liquidity, CRE composition and concentration, capital position and our general oversight and internal control structures regarding the foregoing. As primarily a commercial bank, the Bank has an elevated degree of uninsured deposits compared to larger national banks or smaller community banks with a stronger focus on retail deposits. As a result, the Bank could face increased scrutiny or be viewed as higher risk by regulators and the investor community. In addition, the FDIC estimates that the two recent failures of Silicon Valley Bank and Signature Bank resulted in losses of approximately \$22.5 billion, of which \$19.2 billion is attributable to the protection of uninsured depositors under the Systemic Risk Exception. Federal law requires that any losses to the FDIC's Deposit Insurance Fund related to this action be repaid by a special assessment on banks. The impact of the assessment to the Company for these failures or any potential future failures is not yet known, but is expected to negatively impact operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

In July 2022, the Board of Directors of the Company authorized a stock repurchase program pursuant to which the Company may, from time to time, purchase up to \$50 million of its outstanding common stock. The shares may be repurchased in the open market or in privately negotiated transactions from time to time, depending upon market conditions and other factors, and in accordance with applicable regulations of the Securities and Exchange Commission. The stock repurchase program is intended to expire in three years but may be terminated or amended by the Board of Directors at any time. The stock repurchase program does not obligate the Company to purchase any shares at any time.

There were no stock repurchases during the quarter ended March 31, 2023.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None.

Item 6. Exhibits

Exhibit Number	Description
2.1	Agreement and Plan of Merger by and between Origin Bancorp, Inc. and BT Holdings, Inc. dated February 23, 2022 (incorporated by reference to Exhibit 2.1 to the Company's Form 8-K filed February 24, 2022 (File No. 001-38487))
3.1	Amended and Restated Articles of Incorporation (incorporated by reference to Exhibit 3.1 to the Company's Form 8-K filed April 28, 2020 (File No. 001-38487)).
3.2	Amended and Restated Bylaws (incorporated by reference to Exhibit 3.2 to the Company's Form 8-K filed April 28, 2020 (File No. 001-38487)).
31.1	Certification by Chief Executive Officer pursuant to Rule 13a-14(a) and Rule 15d-14(a).
31.2	Certification by Chief Financial Officer pursuant to Rule 13a-14(a) and Rule 15d-14(a).
32.1	Certification by Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
32.2	Certification by Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

Senior Executive Officer and Chief Financial Officer

CERTIFICATION PURSUANT TO SECTION 302 OF THE SARBANES OXLEY ACT OF 2002

I, Drake Mills, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q of Origin Bancorp, Inc.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
